

How to connect the remote wire on a car amplifier used in your home

Example 1

You can jumper a small wire to the +12V (battery) terminal if you're planning to disconnect the power supply when the amp isn't used.

Example 2

You can jumper and add a small switch if you'd like to manually turn the amp on & off. The amp won't draw any power when it's turned off even if the power supply is on.

Example 3

If you're using a line level converter, you can optionally use one with a remote wire output built in. The amp will turn on and off automatically with the speaker level input signal. These types need power to be connected also.
