M. Edward Warner, 2024 Eighteen year old Jack has never known a world without the ubiquitous Eyebits devices worn over the eyes that allow one to be constantly connected to media and anyone else wearing the device No one is ever without their Eyebit for long and communicating face to face and engaging with the world unconnected are virtually unknown When Jack s father becomes concerned that Jack is failing to grow up he introduces Jack to his own father Pops who refuses to wear an Eyebit ever The ensuing relationship between grandfather and grandson revolves around the restoration of an antique Ford Mustang and it will change Jack s view of the world forever This sci fi tale of family dynamics should enthrall anyone who finds it hard to put down their smartphone Laura K Line Editor Red Adept Editing [Pink Cars and Pocketbooks](#) Jessica A. Brockmole, 2025-01-14 A fascinating history of how the automotive industry and consumers battled to define what women wanted in a car Since the commercial introduction of the automobile US automakers have always sought women as customers and advertised accordingly How then did car culture become so masculine In *Pink Cars and Pocketbooks* Jessica Brockmole shares the untold history of women s relationship with automobiles a journey marked by struggle empowerment and the relentless pursuit of independence This groundbreaking work explores the evolution of women s automotive participation and the cultural shifts that have redefined their roles as drivers mechanics and consumers Brockmole traces the rise of gendered marketing of automobiles over the course of the twentieth century Auto companies created ads that conformed to commonly held ideas about women s relationships with automobiles As the century progressed marketing to women became less informative and even more gendered the automotive industry portrayed women as passengers props or reluctant drivers interested primarily in aesthetics And yet by the 1970s female drivers were communicating directly with each other forming clubs and teaching each other through women focused repair manuals By examining market research studies advertising archives trade journals women s magazines newspapers driving handbooks and repair manuals this book shows how women bought their way into the automobile and masculine car culture Brockmole uncovers the stories of pioneering women who defied conventions such as trailblazer Alice Ramsey the first woman to drive across the United States in 1909 and Barb Wyatt whose contributions to automotive manuals broke new ground Women have always been users of technology and this book illustrates how the auto industry evolved as well as how it chose not to evolve in response
