This book provides a comprehensive overview of the clinical challenges faced during the treatment of patients with cardiovascular syndrome (CVS). The interventional book that associates renal and cardiovascular diseases states that patients with CVS have an increased risk of hospital admission and mortality as a result of their condition; yet, there are no agreed guidelines for their management.

Cardio-Renal Clinical Challenges takes clinical presentations and clinical problems as its focus, and then discusses the evidence for best management of common clinical problems and the reasons for the complex interplay between the cardiac and renal systems. In addition, the link between heart failure and chronic kidney disease (CKD) can impose a considerable epidemiological burden; thus this text also aims to address the issue of organizing healthcare to maximize both the opportunities for prevention and best healthcare systems delivery.

This book will be of immediate value and practical interest to all consulting and trainee cardiologists and renal physicians. And it is hoped that it will encourage greater investigation and collaboration between the fields of nephrology and cardiovascular medicine.

## Cardio Renal Clinical Challenges:

Cardio-Renal Clinical Challenges David Goldsmith, Adrian Covic, Jonas Spaak, 2014-11-12 In modern medicine the aging population is prone to many simultaneous cardiovascular CV risk factors which often produce co incident pathology Nowhere is this more obvious than in the interaction between Chronic Kidney Disease CKD Diabetes and diverse CV diseases CVD This is a complex and challenging area as the presence of CKD diabetes promotes CVD while also complicating its treatment The emergence of CKD as a public health priority is one of the most challenging problems of modern medicine It is now solidly established that renal dysfunction portends a high risk for cardiovascular disease Cardiovascular diseases remains the main cause of death in western societies and the amplification of the death risk conveyed by coexisting CKD even though still poorly understood appears considerable The bidirectional link that associates renal and cardiovascular diseases the high risk of the death signalled by their coexistence and the considerable epidemiological burden imposed by this link is at the basis of the emergence of a new discipline aiming at making the borders between nephrology and cardiovascular medicine even more permeable than before The term Cardio Renal Syndrome was coined around 5 years ago to try to formalize this link and act as a stimulus to interaction between clinical teams researchers and others to achieve better management and outcomes for all This book takes clinical presentations and clinical problems as its base and then discuss the evidence for best management of common clinical problems as well as the reasons for the complex interplay between the cardiac and renal systems Moreover it addresses the issue of organizing healthcare to maximize the opportunities for prevention and best healthcare economic returns building on cutting edge initiatives at the Karolinska Stockholm The book will be of immediate value and interest to all cardiologists and renal physicians *Clinical Pathologic Conferences of Cook County Hospital:*
