**The Carlsen Variation - A New Anti-Sicilian** Carsten Hansen, 2020 Rattle your opponents from the get go How do you change the Sicilian Defense in your favor The Sicilian Defense 1 e4 c5 contains countless variations and sub variations that have been discussed in detail at all levels of play for many years Even small specialized systems have been covered in exhaustive detail in book after book That is why this book is unique The Carlsen Variation which arises after 1 e4 c5 2 Nc3 d6 3 d4 cxd4 4 Qxd4 has never previously been covered in detail before The variation was uncorked by World Champion Magnus Carlsen in 2018 and has since been played by several other top grandmasters such as Fabiano Caruana Hikaru Nakamura and several others Yet despite this attention the theory of the variation is largely unexplored and this book aims to set this discrepancy straight Main lines are established and carefully analyzed with hundreds of new ideas and improvements suggested along the way For the reader this book is an excellent resource to get the opponent out of their opponent's book into our book Time to have some fun in the Sicilian enjoy

*Caruana*: Cyrus Lakdawala, 2018-11-07 Italian American grandmaster Fabiano Caruana is the perfect role model for any aspiring player Already a very strong grandmaster he announced his presence as a leading contender for the world title in 2014 when he scored an incredible 8 10 including seven straight wins from the first seven games in the Sinquefeld Cup in St Louis This was an elite event where he finished an astonishing three points clear of Magnus Carlsen whom he will challenge for the world title in late 2018 Caruana earned this right thanks to his fine victory in the Berlin Candidates where he scored 9 13 and finished a point clear of a world class field Caruana s style is universal He is a very dangerous attacking player who is also equally at home in quiet strategic positions or manoeuvring in an endgame In this respect he is the epitome of the modern grandmaster being a hard working and determined fighter who prepares thoroughly and plays with great determination and accuracy The Move by Move series provides an ideal format for the keen chessplayer to improve their game While reading you are continually challenged to answer probing questions a method that greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of chess knowledge Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn This is

an excellent way to study chess while providing the best possible chance to retain what has been learnt      Endgame Virtuoso Magnus Carlsen Tibor Karolyi, 2018-07-20 Magnus Carlsen's brilliant endgame play has been one of the key reasons for his success. At the age of 13 the Norwegian became the youngest grandmaster in the world, at 19 the youngest number one in the FIDE world rankings and at 22 the second youngest World Champion in history. With his fine technique, great inventiveness, an iron determination, Magnus has won countless endgame positions in which almost everyone else would have settled for a draw. He also has saved endgames that seemed impossible to hold. International Master Tibor Karolyi has studied Carlsen's career and selected more than 90 of his best endgames. He reviews them in chronological order to show how Magnus developed his skills. His technique and his choices are being explained in a manner that is easy to understand for club players. Endgame Virtuoso Magnus Carlsen will help you to appreciate Magnus endgame magic and shows you how to become a better endgame player yourself. A highly instructive, inspiring and entertaining book      **Nepomniachtchi** Cyrus Lakdawala, 2021-11-01 Ian Nepomniachtchi, challenger to Magnus Carlsen's World Championship title in 2021, is an outstanding chess talent. Nepo, as he is universally known, is a fascinating player, and this book assesses his career and analyses his original and creative style in great depth, with numerous deeply annotated games. Nepo is one of the very few players in the world to hold, at least prior to the match, a plus score: four wins to one with six draws against Carlsen in classical chess. Nepo and Carlsen are peers and first started playing each other in the Under 12 category of the World Youth Championship in 2002. In that event, Nepo edged out Carlsen on tie break. At that time, he out-rated Carlsen by 100 points and was generally considered to be the more promising of the two prodigies. Nepo is a fascinating player who loves open and irrational positions and excels when on the attack. Unsurprisingly, he cites Mikhail Tal as his all-time favorite player and says Tal is the player who has exerted the greatest influence on him. As with that great Latvian genius, Nepo thrives on anarchy and chaos and has frequently got the better of Carlsen in games with mind-boggling complications. He is also lethal when he has the initiative. Nepo has steadily climbed the world rankings, and his finest achievement was his victory in the 2020/2021 Candidates tournament with 8 1/2 points (5 2 7) which gave him the right to challenge Carlsen for the world title      Carlsen Cyrus Lakdawala, 2014-11-07 Despite his relatively young age, Magnus Carlsen has already secured his place in chess history as a legend of the game. In a short space of time, his accomplishments have been extraordinary. In December 2012, he broke Garry Kasparov's record to become the highest-rated chess player of all time. He followed up this achievement in 2013 by defeating Vishy Anand to become World Chess Champion. Carlsen's universal style, positional mastery, and incredible mental strength add up to make him a formidable opponent. In this book, former American Open Champion Cyrus Lakdawala invites you to join him in a study of his favourite Carlsen games. Lakdawala examines Carlsen's skills in attack and defence, exploiting imbalances, accumulating advantages, and endgame play, and shows us how we can all improve by learning from Carlsen's masterpieces. Move by Move provides an ideal platform to study chess. By continually challenging the reader to answer

probing questions throughout the book the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of knowledge Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn This is an excellent way to improve your chess skills and knowledge Learn from the games of a world champion Important ideas absorbed by continued practice Utilizes an ideal approach to chess study

**Tactical Training** Cyrus Lakdawala,2021-04-01 It is hard to understate the importance of tactic ability to overall chess proficiency Of course other elements such as a knowledge of opening play and an understanding of strategy are also important However it is undoubtedly the case that 99% of games are won or lost because one player either spots or overlooks a tactic Consider your own games and just imagine how much stronger you would be if you never overlooked a tactical idea The good news is that your tactical ability is not some genetically acquired unalterable trait Tactical ability can always be improved through the application of diligent practice Tactical themes are repetitive The same arrangements of pieces occur again and again and a continual study of the subtle interactions between the forces will inevitably lead to a greater sharpness in actual play In Tactical Training experienced chess coach and prolific author Cyrus Lakdawala guides the reader through numerous tactical themes Topics include Checkmating patterns The 32 major combinational concepts Numerous positions ranked in terms of level of difficulty The final chapter focuses on a 2020 online match between Magnus Carlsen and Hikaru Nakamura currently the top two ranked players in blitz the form of chess where tactics predominate
