**The Paris Agreement on Climate Change** Daniel Klein, María Pía Carazo, Meinhard Doelle, Jane Bulmer, Andrew Higham, 2017-07-26 The most important climate agreement in history the Paris Agreement on Climate Change represents the commitment of the nations of the world to address and curb climate change Signed in December 2015 it entered into force on 4th November 2016 Countries are moving into implementation and efforts at all levels will be needed to fulfill its ambitious goals The Paris Climate Agreement Commentary and Analysis combines a comprehensive legal appraisal and critique of the new Agreement with a practical and structured commentary to and social drivers behind it providing an overview of the pre-existing regime and tracking the history of the negotiations It examines the evolution of key concepts such as common but differentiated responsibilities and analyses the legal form of the Agreement and the nature of its provisions Part II comprises individual chapters on each Article of the Agreement with detailed commentary of the provisions which highlights central aspects from the negotiating history and the legal nature of the obligations It describes the institutional arrangements and considerations for national implementation providing practical advice and prospects for future development Part III reflects on the Paris Agreement as a whole its strengths and weaknesses its potential for further development and its relationship with other areas of public international law and governance The book is an invaluable resource for academics and practitioners policy makers and actors in the private sector and civil society as they negotiate the implementation of the Agreement in domestic law and policy

*Karl Popper, Science and Enlightenment* Nicholas Maxwell, 2017-09-26 Here is an idea that just might

save the world It is that science properly understood provides us with the methodological key to the salvation of humanity A version of this idea can be found in the works of Karl Popper Famously Popper argued that science cannot verify theories but can only refute them and this is how science makes progress Scientists are forced to think up something better and it is this according to Popper that drives science forward But Nicholas Maxwell finds a flaw in this line of argument Physicists only ever accept theories that are unified theories that depict the same laws applying to the range of phenomena to which the theory applies even though many other empirically more successful disunified theories are always available This means that science makes a questionable assumption about the universe namely that all disunified theories are false Without some such presupposition as this the whole empirical method of science breaks down By proposing a new conception of scientific methodology which can be applied to all worthwhile human endeavours with problematic aims Maxwell argues for a revolution in academic inquiry to help humanity make progress towards a better more civilized and enlightened world

*The Flight of Icarus* Yiannis Drossos,2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis focusing on the institution building course of Europe and the Constitution bending course in several Member States It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions
