Ec Fp7 Procurement Guide:

A Coherent European Procurement Law and Policy for the Space Sector Stephan Hobe, Mahulena Hofmannová, Jan Wouters, 2011 Space is a matter of strategic importance and in need of concerted action by the European space actors Distinct approaches to public procurement must not hamper the cooperation between the European Space Agency the European Union and their respective Member States The study provides a toolbox for space procurement that addresses specificities of this sector Each tool is assessed in light of policy objectives market conditions and the legal frameworks of the European Union and the European Space Agency A discussion on selected means of policy implementation other than procurement so called Extra Procurement Instruments complements this toolbox The Third Way in European space procurement caters for both coherence and flexibility needs and is intended to serve policy makers as they finally make Europe in Space a reality

Joint Public Procurement and Innovation Gabriella Margherita Racca, Christopher Yukins, 2020-02-12 Innovation in public procurement is essential for sustainable and inclusive growth in an increasingly globalized economy To achieve that potential both the promises and the perils of innovation must be investigated including the risks and opportunities of joint procurement across borders in the European Union and the United States This in depth research investigates innovation in public procurement from three different perspectives First leading academics and practitioners assess the purchase of innovation with a particular focus on urban public contracting in smart cities involving meta infrastructures public private partnership arrangements and smart contracts A second line of inquiry looks for ways to encourage innovative suppliers Here the collected authors draw on emerging lessons from the US and Europe to explore both the costs and the benefits of spurring innovation through procurement A third perspective looks to various innovations in the procurement process itself with a focus on the effects of joint and cross border procurement in the EU and US landscapes The chapters review new technologies and platforms the increasingly automated means of selecting suppliers and the related efficiencies that big data can bring to public procurement Expanding on research in the editors prior volume Integrity and Efficiency in Sustainable Public Contracts Balancing Corruption Concerns in Public Procurement Internationally Bruylant 2014 this volume builds on a series of academic conferences and exchanges to address these issues from sophisticated academic institutional and practical perspectives and to point the way to future research on the contractual models that are emerging from new procurement technologies

International Handbook on the Economics of Corruption Susan Rose-Ackerman, Tina Søreide, 2011-01-01 Volume Two of the International Handbook on the Economics of Corruption presents a comprehensive detailed and in depth analysis of corruption as well as its economic and policy implications It will be a valuable resource not only for experts and students of corruption studies but also for public officials NGO employees and scholars of economic and political development throughout the world Ararat L Osipian Journal of Economic Issues A companion volume to the International Handbook on the Economics of Corruption published in

2006 the specially commissioned papers in Volume Two present some of the best policy oriented research in the field They stress the institutional roots of corruption and include new research on topics ranging from corruption in regulation and procurement to vote buying and private firm payoffs Understanding the consequences of corrupt transactions requires one to know what is being bought with a bribe and how the behavior of public and private actors has been affected The contributors therefore emphasize how the economic analysis of corruption must take account of the broader context within which bribery and self dealing operate Several chapters offer new approaches to empirical research on corruption that range from individual level data to the macro economy Chapters with an explicit policy focus deal with the efficacy of anti corruption agencies multi stakeholder initiatives red flag warning systems and international conventions This cutting edge work will be an unmatched resource for scholars and students of corruption professionals in international aid and finance organizations and scholars and professionals with more general interests in economic and political development

Sustainable Organic Agriculture for Developing Agribusiness Sector Nikola Puvača,Vincenzo Tufarelli,2021-08-18 Developing sustainable organic agriculture and resilient agribusiness sector is fundamental keeping in mind the value of the opportunity presented by the growing demand for healthy and safe food globally with the expectation for the global population to reach 9 8 billion by 2050 and 11 billion by 2100 Lately the main threats in Europe and worldwide are the increasingly dynamic climate change and economic factors related to currency fluctuations While the current environmental policy provides several mechanisms to support agribusinesses in mitigating organic food for daily increasing human population and stability of the currency it does not contemplate the relative readiness of individuals and businesses to act correctly Organic farming is the practice that relies more on using sustainable methods to cultivate crops and produce food animals avoiding chemicals and dietary synthetic drug inputs that do not belong to the natural ecosystem Organic agriculture can also contribute to meaningful socioeconomic ecologically sustainable development and significantly in the development of the agribusiness sector especially in developing countries

Competition Law and Collusion in Public Procurement Penelope Giosa,2025-08-22 This book examines infringements of competition law in public procurement settings evaluating the latest European Procurement Directive 2014 24 EU to examine to what extent its provisions facilitate or deter collusion during specific award procedures Public contracts account for a significant proportion of EU expenditure In sectors such as energy transport social protection and the provision of health or education services public authorities are the main purchasers It is important to ensure that public contracts are awarded in an open fair and transparent manner that enables domestic and non domestic firms to compete on an equal basis with the aim of improving the quality and lowering the price of purchases made by public authorities This book assesses the competition law enforcement mechanisms that competition regulators bring to the area of public procurement in the attempt to deter bid rigging It analyzes key tools for the public and private enforcement of competition law in the domain of public contracts such as the leniency programme damages claims for bid rigging and the

whistle blower programme The book uses auction theory as benchmark to assess the risk of collusion in the context of procurement procedures and techniques Offering a holistic analysis informed by research it makes recommendations for better design set up and management of public tenders without distorting competition Highlighting the need to make use of competition law enforcement mechanisms in the battle against collusion in public procurement it identifies ways in which the procurement process can be improved to reduce and prevent bid rigging The book will be of interest to researchers in the field of competition law public procurement and EU law Creating Demand for Local Innovations Indian Innovators
