 of various quantitative structure activity relationship QSAR methodologies in different drug therapeutic areas and discusses
 the results in terms of their contribution to medicinal chemistry After briefly describing the developments in QSAR research
 this 12 chapter volume goes on discussing the contributions of QSAR methodology in elucidating drug action and rational
 development of drugs against bacterial fungal viral and other parasitic infections of man Other chapters explore the mode of

 NSAID agents The discussion then shifts to the pharmacologic effects and QSAR analysis of central nervous system agents
 steroids and other hormones A chapter examines the major chemicals affecting insects and mites with particular emphasis on

 potential to stay abreast of the most recent ideas and developments and to become familiar with certain topics in the field of
 sedimentary geology This series deals with subjects that are in the forefront of both scientific and economic interests The
 treatment of a subject in an individual volume therefore should be a combina tion of topical regional and interdisciplinary
 approaches The interdisciplinary aspects are becoming more and more important because most studies dealing with the
 natural sciences cannot effectively stand alone Although this thrust may sound simple in reality it is not basi cally because
 each discipline has developed its own jargon and definitions of terms Communi cation among disciplines is a major issue and
 can be accomplished more constructively when people with different backgrounds join together at the same symposium and
 can read from the same volume rather than confining themselves within the world of their own specialty meetings and
 journals Books in this series provide this connective link between disciplines Each book in this series provides a continuous
 and connected flow of concepts throughout the volume by the use of introductory chapters that outline a topic to help the
 reader grasp its problems and to understand the contributions that follow **Datamation** ,1962
