Eastern Cape Exemplars:

Biogeography and Ecology of Southern Africa Marinus J.A. Werger, A.C. van Bruggen, 2012-12-06 Southern Africa is certainly not a naturally bounded area so that there are several possibilities for delineating it and concepts about its extent. Wellington discussed the various possibilities for delineation and suggested that one line stands out more clearly and definitely as a physical boundary than any other, namely the South Equatorial Divide, the watershed between the Zaïre, Cuanza and Rufiji Rivers on the one hand and the Zambezi, Cunene and Rovuma Rivers on the other. This South Equatorial Divide is indeed a major line of separation for some organisms and is also applicable in a certain geographical sense though it does not possess the slightest significance for many other groups of organisms, ecosystems or geographical and physical features of Africa. The placing of the northern boundary of southern Africa differs in fact strongly per scientific discipline and is also influenced by practical considerations regarding the possibilities of scientific work as subordinate to certain political realities and historically grown traditions. This is illustrated for example in such works as the Flora of Southern Africa where the northern boundary of the area is conceived as the northern and eastern political boundaries of South West Africa, South Africa and Swaziland. Botswana traditionally included in the area covered by the Flora Zambesiaca thus forms a large wedge in Southern Africa.

Land, Law and Chiefs in Rural South Africa William Beinart, Rosalie Kingwill, Gavin Capps, 2021-05-01 This edited collection illustrates contestations over land and political authority in South Africa's rural areas focusing on threats to popular rights and how they are being supported. Who controls the land and minerals in the former Bantustans of South Africa? Chiefs, the state or landholders? Disputes are taking place around the ownership of resources, decisions about their exploitation and who should benefit. With respect to all of these issues, the courts have become increasingly important. The contributors to *Land, Law and Chiefs in Rural South Africa* capture some of these intense contestations over land, law and political authority focussing on threats to the rights of ordinary people. History and customary law feature strongly in most disputes and succession to chieftaincy is also frequently disputed. Judges have to make decisions in a context where rival claimants to property or office assert their own versions of history and custom. The South African constitution recognizes customary law and the courts are attempting to incorporate and develop this branch of jurisprudence as living customary law. Lawyers, community leaders and academics are called on to assist in researching cases around restitution, land rights and customary law. The chapters in this collection discuss legal cases and policy directions that have evolved since 1994. Some chapters analyze the increasing power of chiefs in the South African rural areas while others suggest that the courts are giving support to popular rights over land and supporting local democratic processes. Contributors record significant pushback from groups that reject traditional authority. These political tensions are a central theme of the collection and thus serve as vital case studies in furthering our understanding of rights and restitution in South Africa.
