## **Eastern Cape Paper 1 2014 Life Science:**

Dear Comrade President André Odendaal, 2022-08-01 In his annual presidential address on 8 January 1986 ANC president Oliver Tambo called on South Africans to make apartheid ungovernable through armed action and militant struggle. But unknown to the world on that very day the quiet spoken mathematics teacher and aspirant priest turned reluctant revolutionary had also set up a secret think tank in Lusaka which he named the Constitution Committee giving it an ad hoc unique exercise that had no precedent in the history of the movement. Knowing that all wars end at a negotiating table and judging the balance of forces to be moving in favour of the liberation movement Tambo wanted the ANC to hold the initiative after the fall of apartheid. Assisted by Pallo Jordan he instructed his new think tank to formulate the principles and draft the outlines of a constitution that could unite South Africa when the time came to talk in the fledgling days of freedom and democracy. The seven member team including Albie Sachs, Kader Asmal and Zola Skweyiya started deliberating and reporting to Tambo. In correspondence they typically addressed him as Dear Comrade President. Drawing on the personal archives of participants, Dear Comrade President explains how the purposeful first steps were taken in the making of South Africa's Constitution. Why and how did this process happen? What were the first written words? When and where were they put on paper? By whom? What values did they espouse? And how did the committee's work fit into the broader struggle? This book answers these questions in new paradigm shifting ways.

**Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims, activities and events. *Acta Theriologica*, 2014 *Addressing rural youth migration at its root causes: A Conceptual Framework* Food and Agriculture Organization of the United Nations, 2016-01-01 Distress migration is particularly acute among rural youth. Agriculture and rural development are central to the rate of rural out migration to urban areas. The agricultural sector needs to engage youth in order to increase global food production. In doing so, agricultural transformation can balance out migration from rural areas and thus contribute to stable growth. This document presents the conceptual framework for distress migration of rural youth. The framework focuses on the migration of rural youth aged 15-24 who account for a large proportion of migrants and are a particularly vulnerable group. The framework comprises three sections: 1. Analysis of the main factors determining the propensity of rural youth to migrate; 2. Assessment of the likely impacts of distress migration of rural youth in terms of rural development for local areas of origin; 3. Illustration of the most promising policies and programmes to reduce distress migration of rural youth and maximize its developmental benefits for the communities of origin.

**The Politics of Potential** Michelle Pentecost, 2024-01-12 The first one thousand days of human life or the period between conception and age two is one of the most pivotal periods of human development Optimizing nutrition during this time not only prevents childhood malnutrition but also determines future health and potential The Politics of Potential examines early life interventions in the first one thousand days of life in South Africa drawing on fieldwork from international conferences government offices health care facilities and the everyday lives of fifteen women and their families in Cape Town Michelle Pentecost explores various aspects of a politics of potential a term that underlines the first one thousand days concept and its effects on clinical care and the lives of childbearing women in South Africa Why was the First One Thousand Days project so readily adopted by South Africa and many other countries Pentecost not only explores this question but also discusses the science of intergenerational transmissions of health disease and human capital and how this constitutes new forms of intergenerational responsibility The women who are the target of first one thousand days interventions are cast as both vulnerable and responsible for the health of future generations such that despite its history intergenerational responsibility in South Africa remains entrenched in powerfully gendered and racialized ways

The African Food Environments Amos Laar, Kaleab Baye, Anna Larrey, Francis Zotor, Gershim Asiki, 2023-09-05 In many respects the continent of Africa is in transition Prominent among them currently is the nutrition transition One consequence of the nutrition transition is the increase in prevalence of nutrition related non communicable diseases NCDs such as obesity type 2 diabetes cardiovascular diseases and certain cancers Although NCDs are a global public health problem the rate of increase in NCDs morbidity and mortality in some African countries is staggering This surge has been linked to modifiable environmental factors factors that facilitate the consumption of obesogenic energy dense nutrient poor foods rather than unrefined cereals fruits and vegetables It has long been recognized that the physical and social environments in which people live work and eat are critical determinants of their health More recently there has been a greater focus on the food environment as a key determinant of health Available evidence shows that unhealthy food environments drive unhealthy diets and unhealthy diet is one of four main risk factors for NCDs
