Elementary and Middle School Mathematics John A. Van de Walle, Karen S. Karp, Jennifer M. Bay-Williams, 2009-01-15 It is fun to figure out the puzzle of how children go about making sense of mathematics and then how to help teachers help kids John A Van de Walle Late of Virginia Commonwealth University This is the philosophy behind Elementary and Middle School Mathematics Teaching Developmentally John A Van de Walle wrote this book to help students understand mathematics and become confident in their ability to teach the subject to children in kindergarten through eighth grade Although he could not have foreseen the changes in mathematics teaching over the last three decades he was at the forefront of the movement towards a constructivist view of teaching or teaching developmentally Constructivism says that children construct their own knowledge

They are not blank slates waiting to absorb whatever the teacher tells them Teachers must understand both mathematics itself and how students learn mathematics in order to teach it effectively Learning through problem solving is another major theme of this book Students solve problems not just to apply mathematics but also to learn new mathematics Effective problems will take into account where students are the problematic or engaging aspect of the problem must be due to the mathematics that the students are to learn and not be diluted by non mathematical activities such as cutting or pasting and the problem must require justifications and explanations for answers and methods Learning then becomes an outcome of the problem solving process The book also addresses in more detail than any other book on the market the effect that the trends of standards based education increased pressure to test and increased teacher accountability have had on teaching mathematics He addresses the 2000 NCTM Standards in depth in Chapter 1 on Teaching Mathematics in the Era of the NCTM Standards through the NCTM icon that appears in the margins throughout the text and in two appendices in the back of the book Chapter 5 on Building Assessment into Instruction has also been heavily revised to focus on increased testing pressure creating more explicit links between objectives and assessment and including assessments for students with special needs Elementary and Middle School Mathematics Teaching Developmentally is a book for doing math today for both students who want to become teachers and the students they will eventually teach New To This Edition NEW Revises Chapter 5 on assessment Discusses increased testing pressure and accountability adds more information on equitable assessments creates more explicit links between objectives and assessment and includes assessments for students with special needs NEW Updates the Literature Connections feature to remove all out of print children s literature and include more non fiction poetry and other types of readings NEW Weaves the Focal Points throughout the chapters as well as links them with the Big Ideas feature Focal Points have also been added to the Appendix NEW Includes expanded coverage of working with diverse learners NEW Gives greater emphasis on dealing with math anxiety [Reconceptualizing Mathematics](#) Judith Sowder,Larry Sowder,Susan Nickerson,Ian Whitacre,2023-03-03 Learn by doing with active resources discussions and support in Reconceptualizing Mathematics and Achieve Student centered lessons model the teaching that will eventually be expected of you as you gain valuable hands on experience with technology problem solving and quantitative reasoning
