

2 - THE ELECTRIC FIELD 1

The electric field concept

The electric field is an acceleration of space surrounding charge. It is created by source and exerts an electric force on other charge.

The electric field is defined by the effect on a test charge q .

$$\vec{E} = \frac{F_{\text{on } q}}{q}$$

The units of the electric field are N/m or V/m

We can visualize the electric field through electric field lines:

- The field direction is tangent to the curve at each point
- Lines closer together indicate stronger electric fields
- Field lines start on positive charge and end on negative
- Field lines never cross

A Single point charge

A single point charge of q generates an electric field by

$$\vec{E} = \frac{1}{4\pi\epsilon_0} \times \frac{q}{r^2}$$

→ The electric field points away from positive charge and toward negative charge
