Cyclostationarity: Theory and Methods - II Fakher Chaari, Jacek Leskow, Antonio Napolitano, Radoslaw Zimroz, Agnieszka Wylomanska, Anna Dudek, 2015-04-15 This book reports on the latest advances in the analysis of non stationary signals with special emphasis on cyclostationary systems It includes cutting edge contributions presented at the 7th Workshop on Cyclostationary Systems and Their Applications which was held in Gr dek nad Dunajcem Poland in February 2014 The book covers both the theoretical properties of cyclostationary models and processes including estimation problems for systems exhibiting cyclostationary properties and several applications of cyclostationary systems including case studies on gears and bearings and methods for implementing cyclostationary processes for damage assessment in condition based maintenance operations It addresses the needs of students researchers and professionals in the broad fields of engineering mathematics and physics with a special focus on those studying or working with nonstationary and or cyclostationary processes

Technology, Media Literacy, and the Human Subject Richard S. Lewis, 2021-06-03 Media literacy is often focused on evaluating the message rather than reflecting on the medium Bringing together postphenomenology media ecology posthumanism and complexity theory Richard Lewis s book offers a method for such a reflection and shows how our everyday media environments constitute us as post human subjects one that is becoming and constitutes through relations also with our media technologies An original interdisciplinary effort including for example the term intrasubjective mediation and a must read book for everyone interested in how we become with and through technologies Prof Mark Coeckelbergh University of Vienna Technology Media Literacy and the Human Subject is a clearly and concisely written book that employs a fruitful transdisciplinary approach It at once offers an excellent grounding in the literature whilst simultaneously developing a useful tool for students to reflect deeply and critically upon their own engagement with media Thoroughly recommended Alexander Thomas University of East London What does it mean to be media literate in today s world How are we transformed by the many media infrastructures around us We are immersed in a world mediated by information and communication technologies ICTs From hardware like smartphones smartwatches and home assistants to software like Facebook Instagram Twitter and Snapchat our lives have become a complex interconnected network of relations Scholarship on media literacy has tended to focus on developing the skills to access analyze evaluate and create media messages without considering or weighing the impact of the technological medium how it enables and constrains both messages and media users Additionally there is often little attention paid to the broader context of interrelations which affect our engagement with media technologies This book addresses these issues by providing a transdisciplinary method that allows for both practical and theoretical analyses of media investigations Informed by postphenomenology media ecology philosophical posthumanism and complexity theory the author proposes both a framework and a pragmatic instrument for understanding the multiplicity of relations that all contribute to how we affect and are affected by our relations with media technology The author argues persuasively that the

increased awareness provided by this posthuman approach affords us a greater chance for reclaiming some of our agency and provides a sound foundation upon which we can then judge our media relations This book will be an indispensable tool for educators in media literacy and media studies as well as academics in philosophy of technology media and communication studies and the post humanities
