The Aubin Academy: Revit MEP 2013 Paul F. Aubin, Darryl McClelland, Martin Schmid, Gregg Stanley, 2012-07-13 The Aubin Academy Master Series Revit MEP is the ideal book to help readers successfully use Revit MEP. It is a concise manual focused squarely on the rationale and practicality of the Revit MEP Building Information Model (BIM) process. The book emphasizes the process of creating projects in MEP rather than a series of independent commands and tools. The goal of each lesson is to help the reader complete their projects successfully. Tools are introduced together in a focused process with a strong emphasis on why as well as how. The text and exercises seek to give the reader a clear sense of the value of the tools and a clear indication of each tool's potential. The Aubin Academy Master Series Revit MEP is a resource designed to shorten your learning curve, raise your comfort level, and most importantly, give you real-life tested practical advice on the usage of the software to create mechanical, electrical, and plumbing designs and calculations. Empowered with the information within this book, you will have insight into how to use Revit MEP to create coordinated BIM project models and documentation. Includes practical project-focused exercises where readers learn by doing. Focused on MEP Production so readers can learn to create a coordinated BIM model and documentation set. Written by authors with over 75 years of combined real-world architectural and MEP industry experience. Provides Power User BIM Manager tips throughout. Includes free online download of complete dataset of project files to follow along in the exercises. [Revit MEP Step by Step 2021 Metric Edition](#)

Lu-Yen Chang, The purpose of this book is to provide efficient materials for those who want to learn the software of Autodesk Revit, especially for those who are interesting in building MEP systems. This book is ideal for school students and instructors. It also helps MEP professionals who want to add this software tool to enhance their works. As the title Step by Step of this book implies, readers will exercise the software from the beginning to the end of the modeling. That's how you get the whole picture of the entire story and learn the software. This book covers five major disciplines of MEP systems: Mechanical, Hydronic Piping, Electrical, Plumbing, and Fire Protection. Besides the modeling of 3D Duct Works, Conduits, and Piping, it also covers Energy Analysis, Lighting Calculation, Schedule Creations, and many MEP-related Properties. The last two are really the heart of Building Information. Author also included a bonus chapter of Architectural Modeling that will give reader extra background and experience of the software. I wrote this book in two versions: Imperial and Metric. Reader can choose the one to suit his/her need. With 1000 steps, 1000 figures, 60 exercise files, download from author's Google Drive to guide you to complete the entire modeling of a building, there is no reason you cannot succeed.
