web standard test method for the deformation of sheet metal material by the ball punch the ball punch deformation test is widely used to evaluate and compare the formability of metallic sheet materials biaxial stretching is the predominant mode of deformation that occurs during the test and therefore the results are used more frequently to

astm e643 standard test method for ball punch deformation - Jun 13 2023

web astm e643 this test method covers the procedure for conducting the ball punch deformation test for metallic sheet
