Estimating the Effects of the Trans-Pacific Partnership (TPP) on Latin America and the Caribbean (LAC)

Diego A. Cerdeiro, 2016-05-23 In February 2016 twelve Pacific Rim countries signed the agreement on the Trans Pacific Partnership TPP one of the largest and most comprehensive trade deals in history While there are several estimates of the likely effects of the TPP there is no systematic study on the effects on all Latin American countries We present the results from applying a multi sector model with perfect competition presented by Costinot and Rodriguez Clare 2014 The exercise based on input output data for 189 countries and 26 sectors shows that i Asian TPP members are estimated to benefit most from the agreement ii negative spillovers to non TPP LAC countries appear to be of a different order of magnitude than the gains of members and iii some non TPP LAC countries may experience relatively large benefits from joining the TPP As a cautionary note however we point out that even a cursory cross study comparison shows that there is considerable uncertainty regarding the potential effects of the TPP for both members and non members
