

## Balancing Act

Name \_\_\_\_\_

Atoms are not created or destroyed during a chemical reaction. Scientists know that there must be the same number of atoms on each side of the reaction. To balance the chemical equation, you must add coefficients in front of the chemical formulas in the equation. You cannot add or remove subscripts.

- 1) Determine number of atoms for each element
- 2) Pick an element that is not equal on both sides of the equation.
- 3) Add coefficients in front of the element and adjust your counts.
- 4) Continue adding coefficients until you get the same number of elements on each side.

Example:

Try these:

# Balancing Act Science Spot Answer Key

**Charlotte Clark, AI**

## **Balancing Act Science Spot Answer Key:**

*Fruit Drying Methods* Charlotte Clark, AI, 2025-02-27 *Fruit Drying Methods* explores the art and science of preserving fruits offering readers a path to self sufficiency and family food security The book emphasizes that drying is not merely a preservation technique but a means to healthier eating and stronger relationships through shared activities Readers will discover how understanding dehydration principles such as managing moisture content to prevent microbial activity is key to successful fruit drying The book progresses logically from fundamental concepts like fruit selection and essential equipment to diverse drying methods including sun drying oven drying and dehydrator use It uniquely integrates detailed technical information with the social aspects of family food storage highlighting how preparing together can foster stronger family relationships The culmination is practical guidance on creating tailored food storage plans ensuring families can enjoy the fruits of their labor year round promoting sustainable living and family resilience
