Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions Francesco Silvestri, Nicola Moraci, 2019-10-22 Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions contains invited keynote and theme lectures and regular papers presented at the 7th International Conference on Earthquake Geotechnical Engineering Rome Italy 17-20 June 2019. The contributions deal with recent developments and advancements as well as case histories, field monitoring, experimental characterization, physical and analytical modelling and applications related to the variety of environmental phenomena induced by earthquakes in soils and their effects on engineered systems interacting with them. The book is divided into the sections below: Invited papers, Keynote papers, Theme lectures, Special Session on Large Scale Testing, Special Session on Liquefaction Projects, Special Session on Lessons learned from recent earthquakes, Special Session on the Central Italy earthquake. Regular papers: Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions provides a significant up-to-date collection of recent experiences and developments and aims at engineers, geologists and seismologists, consultants, public and private contractors, local, national and international authorities and to all those involved in research and practice related to Earthquake Geotechnical Engineering. **The Greening of America's Building Codes** Aleksandra

Jaeschke, 2022-12-20 Environmental disasters and severe weather due to climate change, both triggered by human actions, have had an increasingly direct impact on our homes. But the way in which America builds its homes is part of the problem. This deeply researched history of sustainable design standards in building codes explores how public policy, standard setting, trade associations and financial incentives influence the ways in which the construction of our homes impacts the environment. The Greening of America's Building Codes investigates the regulations and economic incentives meant to control the environmental impact of contemporary construction practices as it analyzes the history of residential building codes. The book exposes how the socioeconomic and political forces that influenced early building code development continue to define the character of current building codes and, by extension, determine how we regulate environmental impact and define sustainability today. More relevant than ever, The Greening of America's Building Codes is a valuable tool for architects, architecture students, builders, real estate developers and homeowners who want to understand how public policy and their own day-to-day decisions impact the environment. **2018 International Existing Building Code Handbook** Chris

Kimball, 2019-08-16 Renovate, repair or retrofit existing buildings in complete compliance with the 2018 IEBC. This practical guide shows step-by-step how to apply the provisions of the 2018 International Existing Building Code (IEBC) when performing repairs, change of occupancy, retrofits and seismic evaluations in buildings of all sizes. The book contains all the information you need to understand with the complex provisions in the code and apply them properly to meet structural safety requirements. 2018 International Existing Building Code Handbook opens with an overview of the IEBC and of permits.
