If you have an HD-capable television connected via a Coax connection, you will be able to view TV Series and TV Essentials channels in High Definition by tuning to either the two-digit or three-digit Standard Definition channel or the corresponding HD Channel in the HD300 series range. For example, with a Coax line, the Weather Channel may be viewed in HD on either channel 43 or channel 104.3 (the Weather Channel's location in your market may be different). If your television is connected via equipment other than a coax line, such as a Coax-to-HDMI converter or a Coax-to-Component converter, you may not be able to view the HD content.
