If you have an HD-capable television connected via a Coax video line, you will be able to view TV Weather and TV Essential channels in High Definition by tuning to either the two-digit or three-digit Standard Definition channel or the corresponding HD Channel in the 1000+ range. For example, with a coax line, the Weather Channel may be viewed in HD on either channel 63 or channel 104-109. The Weather Channel numbers in your market may be different. If your television is connected via equipment other than a coax line, such as a Co-HD receiver or a Co-matrix, Co-HD reception with a Cable-HD compatible set-top device (and Co-connected Digital Video Recorder for certain channels), access to HD is available in both definition only at the HD Channel number - usually the two-digit number above 1000.
