Empowering Students Through Multilingual and Content Discourse Finley, Stacie Lynn, Correll, Pamela, Pearman, Cathy, Huffman, Stephanie, 2023-07-25 Empowering Students Through Multilingual and Content Discourse is a peer reviewed research book that challenges the traditional monolingual classroom approach where the teacher's voice dominates and only the dominant culture's language is considered the path to success. The book aims to empower students by creating classroom spaces where all voices are heard, valued, and empowered. It draws on research from scholars who study discourse and offers insights into how discourse can be used to promote language and literacy development, honor all students' voices, and empower them. This book also provides guidance on culturally and linguistically sustaining discourse practices and encourages educators to incorporate students' home languages and discourse practices in classroom instruction. It challenges educators to move away from centering White English and represent language more responsibly within the classroom. This research is a valuable resource for academic scholars and a useful tool for teachers looking to cultivate student-centered classroom practices. By encouraging discourse among students, educators can create a space where human life holds meaning and students feel empowered to act and use their voices.

Innovation and Entrepreneurship in an Educational Ecosystem Sehwa Wu, Carol Yeh-Yun Lin, 2020-01-01 This book reports on 12 education innovation cases in Taiwan and focus particularly on an ecosystem to demonstrate innovation as a competitive advantage and requires an ecosystem to be sustainable in virtually all disciplines. It also covers the trend of education innovation in many countries with education entrepreneurship being the frequently used description. The 12 educators highlighted here are even more entrepreneurial than many businesspeople. Generally, schools are required to follow certain rules, especially the public schools. Accordingly, the book also describes how these education entrepreneurs have innovatively created a fostering environment under challenging constraints to facilitate the success of students, teachers, and even the local community. Six of the cases involve school-based innovation, while the other six focus on student-based innovation. Their stories provide valuable insights for all companies seeking to become more innovative in a resource-constrained setting.

Latinos/as and Mathematics Education Kip Téllez, Judit N. Moschkovich, Marta Civil, 2011-05-01 This book explores the mathematics education of Latinos/as in 13 original research studies. Each chapter represents research that grounds mathematics instruction for Latinos/as in the resources to be found in culture and language. By inverting the deficit perspective, this volume redresses the shortcomings found in the previous literature on Latino learners. Each study frames language, e.g., bilingualism, not as an obstacle to learning but as a resource for mathematical reasoning. Other chapters explore the notion of cultural variation not as a liability but as a tool for educators to build upon in the teaching of mathematics. Specifically, the book reframes culture as a focus on the practices, objects, inscriptions, or people that connect mathematical concepts to student thinking and experiences both in and out of school. The book's four sections divide the research. The first section of the book focuses on mathematics learning in

classrooms specifically exploring bilingual Latino students the second section explores Latino learners in communities including the role parents can play in advancing learning the third section includes chapters focused on teacher professional growth the final section concerns the assessment and misassessment of Latino learners The research shared in this volume provides ample evidence that mathematics educators who choose to ignore language or culture in their pedagogy risk shortchanging their Latino students *Inspiring Middle and Secondary Learners* Kathleen Kryza, S.
