Crime And Personality Psychology Revivals:

Crime and Personality H. J. Eysenck, 2013-10-31 When *Crime and Personality* was first published in 1964 J A C Brown writing in the *New Statesman* commented There can be no doubt of the importance of Professor Eysenck's book on the nature and treatment of criminal behaviour This third edition originally published in 1977 had been completely revised and brought up to date and although the major theory linking personality and crime has been retained many of the details have been changed in conformity with recent research of the time The book presents a theory concerning the personality of criminals and offers evidence to show that these personality features characterising criminals are based on genetic foundations It is argued that criminality as a whole is not exclusively based on environmental factors as has so often been suggested but has a strong biological basis A good deal of evidence is reviewed showing that there are many data supporting this view from studies of identical and fraternal twins adopted children and comparisons between criminals and non criminals both in the Western world and in Communist countries Professor Eysenck suggests that important consequences follow from such an attempt to redress the one sided emphasis on environmental factors which had been so characteristic of the previous fifty years and some of these consequences are described in detail He further suggests that only proper understanding of the psychological factors making for antisocial behaviour will help in reversing the increasing burden that criminality places upon society The book also takes issue with political arguments of the time regarding the origins of criminality and shows that criminals behind the Iron Curtain show the same personality characteristics as do criminals in Western countries

Crime and Personality Hans Jurgen Eysenck, 1977 **Crime and personality** Hans Jürgen Eysenck, 1970 *From zero to hero* Wanda Montanelli, 2023-12-13 In daily encounters on TV press editorials and news reports the only reason seeming to compel insiders is their circulation or audience Everyone else turns a blind eye to it Nobody cares about knowing that the higher the audience the more links to Twitter there'll be or that the more likes on Facebook there'll be the seeds of gratuitous violence are more effectively sown This is called emulation or in the psychopathology of communication the Werther effect Our society is full of frustrated individuals who ascribe their own failings to the world around them and it may be the case that some marginalised people regard themselves as being rather low on the social scale and therefore choose to give themselves hero status worthy of the newspaper front pages Consequently they may happen to take action by seizing a firearm in search of verification of them transforming their empty existence into stuff of legend giving enough to take about for days months and years to come Such a breakthrough from zero to hero Translator Rhys Llwyd PUBLISHER TEKTIME
