

Critical Care Case Study

NURS 451 - Clinical Management of Adult Health Nursing III

Purpose of Assignment

The purpose of this case study is to integrate knowledge from the humanities and sciences, including nursing research and theory, to plan, provide, and evaluate holistic care provided to a client selected during this clinical rotation.

Student Approach to Assignment

I chose to write this case study on this particular patient because this was the first patient I had cared for that was not generally awake and alert. This patient came into the hospital with a septic infection that progressed to an inability to adequately oxygenate himself and renal failure. He had been on a ventilator for several weeks by the time I was with him and had received a tracheostomy through which to be mechanically ventilated. This experience was difficult for me as he did not respond on any level to anything except for pain.

Reason for Inclusion of this Assignment in the Portfolio

This assignment gave me a new outlook on patient care and an experience that I had yet to have first hand. Caring for this patient was difficult for me for many reasons. The following program objectives are highlighted in this case study:

Critical Thinking

Evaluates nursing care outcomes through the acquisition of data and the questioning of inconsistencies

By assessing and reassessing this patient, I was able to quickly notice the changes our interventions were causing. Also, rounds on this patient included a discussion as to his need or contraindication of heparin as an anticoagulant related to his platelet and aggregation counts. This patient was still on heparin but was being evaluated on the first day for heparin-induced thrombocytopenia and on the second day, for disseminated intravascular coagulation. Both of these were the discussions during interdisciplinary rounds.

Nursing Practice

Applies appropriate knowledge of major health problems to guide nursing practice

By researching and understanding the pathophysiology going on with this patient, I was better able to treat his multiple organ dysfunction syndrome by not only correcting the root cause of the problem, but also by intervening with the associated signs and symptoms to lessen their devastating effects on this patient's health. We used his ABG values to determine appropriate ventilation settings and to ensure that his body was being properly oxygenated.

Critical Care Case Studies:

Case Studies in Critical Care Nursing Barbara Clark Mims, 1990 Case Studies in Adult Intensive Care Medicine Daniele Bryden, Andrew Temple, 2017-04-20 Guiding FFICM and EDIC exam candidates through the intensive care medicine curriculum this book provides 48 case studies mapped to eight key areas of study in the UK and European syllabuses Cases include clinical vignettes explanations and a list of key learning points while also being formatted along the structure of FICM case reports Key clinical management points are identified and linked to appropriate scientific or evidence based research and case studies chosen reflect a general population relevant to a worldwide readership Conditions covered are significant to large areas of clinical practice as well as more discrete specialist knowledge making this an essential study guide for trainees preparing for exams in intensive care medicine and also a useful learning tool for candidates in related disciplines such as anaesthesia FRCA emergency medicine MCEM and surgery MRCS Advanced Practice in Critical Care Sarah McGloin, Anne McLeod, 2010-02-09 Advanced Practice in Critical Care provides experienced critical care nurses with a clear and distinct evidence base for contemporary critical care practice Central to the book is the application of research and evidence to practice and therefore case studies and key critical care clinical situations are used throughout to guide the reader through the patient care trajectory Each chapter introduces an initial patient scenario and as the chapter progresses the patient scenario develops with the theoretical perspectives and application In this way it is evident how multi organ dysfunction develops impacting upon and influencing other body systems demonstrating the multi organ impact that is often experienced by the critically ill patient In this way consequences of critical illness such as acute renal failure haemostatic failure and liver dysfunction are explored Throughout the text key research findings and critical care treatment strategies are referred to applied and evaluated in the context of the given patient case study Advanced assessment techniques are explained and the underlying pathophysiology is discussed in depth Advanced Practice in Critical Care is an essential resource for experienced practitioners within critical care whom primarily care for patients requiring high dependency or intensive care

Case Studies in Pediatric Critical Care Peter J. Murphy, Stephen C. Marriage, Peter J. Davis, 2009-06-11 Presents a spectrum of real and interesting case studies relating to critically ill children **Review of Critical Care Nursing** Sheila Drake Melander, 1996 Critical care nursing requires you to interpret and apply a great deal of information quickly and accurately That kind of critical thinking takes practice the kind of practice you will find in Review of Critical Care Nursing Case Studies and Applications The 26 case studies and corresponding questions boost your ability to make competent confident decisions Based on actual clinical experiences the case studies thoroughly describe a variety of pulmonary cardiac renal neurological gastrointestinal endocrine and multisystem problems from symptoms through management After each case study a set of 10-20 questions challenges your critical thinking decision making and deductive reasoning skills *Clinical Cases in Critical Care* Alice Myers, Theophilus Samuels, 2022-11-21 Clinical Cases in Critical Care In Clinical Cases in Critical

Care the authors explore core clinical topics and basic sciences in a practical and realistic way and include comprehensive discussions focusing on critically unwell patients with a variety of presentations and underlying disorders including COVID 19 hypotension stroke and drug overdose Each case begins with a clinical vignette which generates a series of questions the reader must address Cases are expanded to discuss differential diagnoses investigations and management issues Further questions direct the reader to explore relevant clinical and scientific knowledge similar to the structure of many professional oral examinations The final section of the book consists of exam style questions in a multiple choice and single best answer style Perfect for medical practitioners working in critical care settings **Clinical Cases in Critical Care** provides a thorough and accessible reference for trainee physicians with an interest in critical and emergency care as well as allied health professionals in the field This engaging textbook will be an essential companion for anyone getting to grips with the foundation of specialist knowledge required by professionals working in intensive care medicine *Evidence-Based Critical Care* Robert C. Hyzy, 2017-05-30 This book provides learners with a unique opportunity by virtue of the format outlined above Each case presentation has a case vignette which leads up to an important clinical question and is followed by additional discussion which resolves the question posed This is a new way to present knowledge in a medical book and should help critical care practitioners fellows residents allied health professionals and students expand their critical care knowledge in an efficient and effective manner This approach should also benefit those preparing for board examinations **Case Studies in Critical Care Nursing** Sheila Drake Melander, 2004 Containing detailed and up to date case studies on critical care conditions with accompanying questions and answers for applied learning of the practice of critical care nursing this resource allows the reader to hone vital skills that are necessary in a critical care environment **Case Studies in Critical Care Medicine** Roy D.
