Cornelius-White, 2008 Facilitating children's and adolescents' growth has been a challenge and major concern for person-centred work since the beginning of the approach in the 1940s. During the past decade a shift in this domain has generated numerous new concepts, research and practice making a considerable impact on both the professional tasks and training of educators, counsellors and psychotherapists. Fifteen original chapters and a foreword from Brian Thorne describe this development. The chapters began as presentations from a symposium at the Potsdam PCE 2006 World Association conference, thus reflecting international perspectives emerging around the world today. Framed by two chapters from the editors, the book provides a comprehensive overview of state-of-the-art person-centred work with children, adolescents and parents and identifies emerging themes in the field. Forthcoming Books Rose Arny, 2004
Care-Therapy for Children Ken Redgrave, 2000 Kenneth Redgrave introduces the theory and practice that child care workers need to grasp when using third objects such as paint, computers and music when delivering therapy and counselling.
