Contesting Stereotypes and Creating Identities Andrew J. Fuligni, 2007-05-31 Since the end of legal segregation in schools most research on educational inequality has focused on economic and other structural obstacles to the academic achievement of disadvantaged groups But in Contesting Stereotypes and Creating Identities a distinguished group of psychologists and social scientists argue that stereotypes about the academic potential of some minority groups remain a significant barrier to their achievement This groundbreaking volume examines how low institutional and cultural expectations of minorities hinder their academic success how these stereotypes are perpetuated and the ways that minority students attempt to empower themselves by redefining their identities The contributors to Contesting Stereotypes and Creating Identities explore issues of ethnic identity and educational inequality from a broad range of disciplinary perspectives drawing on historical analyses social psychological experiments interviews and observation Meagan Patterson and Rebecca Bigler show that when teachers label or segregate students according to social categories even in subtle ways students are more likely to rank and stereotype one another so educators must pay attention to the implicit or unintentional ways that they emphasize group differences Many of the contributors contest John Ogbu s theory that African Americans have developed an oppositional culture that devalues academic effort as a form of acting white Daphna Oyserman and Daniel Brickman in their study of black and Latino youth find evidence that strong

identification with their ethnic group is actually associated with higher academic motivation among minority youth Yet as Julie Garcia and Jennifer Crocker find in a study of African American female college students the desire to disprove negative stereotypes about race and gender can lead to anxiety low self esteem and excessive self defeating levels of effort which impede learning and academic success The authors call for educational institutions to diffuse these threats to minority students identities by emphasizing that intelligence is a malleable rather than a fixed trait Contesting Stereotypes and Creating Identities reveals the many hidden ways that educational opportunities are denied to some social groups At the same time this probing and wide ranging anthology provides a fresh perspective on the creative ways that these groups challenge stereotypes and attempt to participate fully in the educational system American History John Arthur Garraty, Aaron Singer, Michael J. Gallagher, 1982 A textbook of American history from the Ice Age to the presidency of Ronald Reagan Includes reading practice skill building reviews and tests **Creating Thinking Classrooms** Garfield Gini-Newman, Roland Case, 2018-03-22 Reinvigorating today s schools with Critical Creative and Collaborative thinking Critical creative and collaborative thinking should be at the centre of all 21st century teaching and learning Creating Thinking Classrooms is loaded with examples stories and strategies for reinvigorating schools with this quality thinking Written for leaders who support teachers this guide treats educational change as a process of renovation rather than process of revolution and emphasizes building upon refining and sustaining the many good things happening in today s schools Practical and user friendly it emphasizes five key principles for learning and teaching Engaging students Sustaining inquiry Nurturing self regulated learners Creating assessment rich learning Enhancing learning through digital technology As a balanced and reasoned response to the challenges and opportunities facing schools this book separates the rhetoric of school reform from reality by analyzing what s actually happening and offering a plan educators can use Recapture the fundamentals of classroom learning with a practical and powerful roadmap charting the way forward As a principal and community superintendent I observed firsthand how transformational the work of Garfield Gini Newman and Roland Case is in the school community and on a systemic level in the school community and on a systemic level Creating Thinking Classrooms takes theory and research and places it directly into the hands of practitioners by offering thoughtful and immediately useful strategies Not only does this work transform engagement and achievement but it also transforms thinking for both teachers and their students Teaching and learning go from passive acquisition of information to active purposeful and deliberate interaction with the curriculum It is a must read Ursula A Hermann Ph D retired principal and community superintendent Montgomery County Public Schools What impresses me most about Creating Thinking Classrooms is the notion of framing the retooling of schools as renovation or reinvigoration rather than as revolution Too many seem to ignore that there are many good things worth preserving in our schools and others that need to be reframed or recast to give them greater currency This book builds on what has worked and makes it better The message being purposeful and patiently

focused on long term success is a powerful one that needs to be heard above the din David Chojnacki Executive Director
