Creation In Death In Death 25:

Creation Ethics David DeGrazia, 2012-06-01 The ethics of creating or declining to create human beings has been addressed in several contexts debates over abortion and embryo research literature on self creation and discussions of procreative rights and responsibilities genetic engineering and future generations Here for the first time is a sustained scholarly analysis of all of these issues a discussion combining breadth of topics with philosophical depth imagination with current scientific understanding argumentative rigor with accessibility The overarching aim of *Creation Ethics* is to illuminate a broad array of issues connected with reproduction and genetics through the lens of moral philosophy With novel frameworks for understanding prenatal moral status and human identity and exceptional fairness to those holding different views David DeGrazia sheds new light on the ethics of abortion and embryo research genetic enhancement and prenatal genetic interventions procreation and parenting and decisions that affect the quality of life of future generations Along the way he helpfully introduces personal identity theory and value theory as well as such complex topics as moral status wrongful life and the nonidentity problem The results include a subjective account of human well being a standard for responsible procreation and parenting and a theoretical bridge between consequentialist and nonconsequentialist ethical theories The upshot is a synoptic mostly liberal vision of the ethics of creating human beings **The Creation of Death and Life** Rachel

Austriaco Op Nicanor Pier Giorgio, Nicanor Pier Giorgio Austriaco, 2024-11-29 Written and revised over the past three years *Creation through Evolution* contains ten new essays that directly respond to the most common philosophical and theological objections put forward by Catholics who are skeptical about evolutionary theory Significantly the authors use the conceptual framework of St Thomas Aquinas as a starting point to engage in the faith and science dialogue and they take the Catechism of the Catholic Church as their starting point The contributors believe that the solutions proposed by these essays to the disputed questions raised by skeptics are novel and robust The contents of the essays were presented at colloquia at the University of Oxford and Providence College and were revised in response to criticisms and comments raised by the other participants at these meetings The chapters were written to respond to Catholic skeptics of Darwinian evolution They are meant to be read not only by scholars but also by graduate and undergraduate students *Creation through Evolution* will be of interest to the informed Catholic reader who is struggling to reconcile evolutionary theory with the claims of the Catechism of the Catholic Church Scenario of the Photo-drama of Creation ...
