**Psychology, A Manual for Judges, Practitioners, and Students** Hans Gross, 2022-06-10 Excerpt Socrates dealing in the

Meno with the teachability of virtue sends for one of Meno's slaves to prove by him the possibility of absolutely certain a priori knowledge. The slave is to determine the length of a rectangle the contents of which is twice that of one measuring two feet but he is to have no previous knowledge of the matter and is not to be directly coached by Socrates. He is to discover the answer for himself. Actually the slave first gives out an incorrect answer. He answers that the length of a rectangle having twice the area of the one mentioned is four feet, thinking that the length doubles with the area. Thereupon Socrates triumphantly points out to Meno that the slave does as a matter of fact not yet quite know the truth under consideration but that he really thinks he knows it and then Socrates in his own Socratic way leads the slave to the correct solution. This very significant procedure of the philosopher is cited by Guggenheim as an illustration of the essence of a priori knowledge and when we properly consider what we have to do with a witness who has to relate any fact we may see in the Socratic method the simplest example of our task. We must never forget that the majority of mankind dealing with any subject whatever always believe that they know and repeat the truth and even when they say doubtfully "I believe." It seems to me there is in this tentativeness more meant than meets the ear. When anybody says "I believe" that it merely means that he intends to insure himself against the event of being contradicted by better informed persons but he certainly has not the doubt his expression indicates. When however the report of some bare fact is in question "It rained," "It was 9 o'clock," "His beard was brown" or "It was 8 o'clock" it does not matter to the narrator and if he imparts such facts with the introduction "I believe" then he was really uncertain. The matter becomes important only where the issue involves partly concealed observations, conclusions and judgments. In such cases another factor enters: conceit. What the witness asserts he is fairly certain of just because he asserts it and all the "I believe"s and "It seemed"s are merely insurance against all accidents.

Readers' Guide to Periodical Literature, 1920      Criminal Profiling Brent E. Turvey, 2011-03-09 Focused on Behavioral Evidence Analysis (BEA) a method of criminal profiling developed and refined by the author over the past 15 years, the fourth edition of *Criminal Profiling* maintains the same core foundation that made previous editions best sellers in the professional and academic community worldwide. Written from practicing behavioral analysts and aspiring students alike, this work emphasizes an honest understanding of crime and criminals. Newly updated mechanisms for the examination and classification of both victim and offender behavior have been improved. In addition to refined approaches towards victimology, crime scene analysis, motivation and case linkage, a chapter on sexual deviance has been added as well. With prior edition in wide use as a primary text in criminal justice, law, criminology and behavioral science programs around the world, *Criminal Profiling* Fourth Edition remains essential for students and professionals alike. Outlines the scientific principles and practice standards of BEA oriented criminal profiling with an emphasis on applying theory to real cases. Contributing authors from law
