Critical Approaches to African Cinema Discourse Nwachukwu Frank Ukadike, 2014-02-27 Critical Approaches to African Cinema Discourse utilizes an interdisciplinary approach to lay bare the diversity and essence of African cinema discourse It is an anthology of historical reflections critical essays and interviews by film critics historians theorists and filmmakers that signifies a dialogue and engagement apropos the ideology and cultural politics of film production in Africa The contributors are extremely concerned not only with the history of African cinema but with its future and its potential This book then is not limited to the expansion of the discourse on African cinema but tries to approach the definition of the critical canon within the exigencies and manifestations of art and African sociopolitical practices The authors view these practices as an investment in a cultural

imperative stemming from the quest to delineate how critical methodologies are derived from and shape contemporary historical and cultural practices Hence the contributions are less about the usual constrictive method of analysis and more about illustrating manifestations of an interrogative critical methodology that is certainly an offspring of an indigenous African critical cum cinematic culture and paradigms

*Fault Lines and Controversies in the Study of Seventeenth-century English Literature* Claude J. Summers, Ted-Larry Pebworth, 2002 Written by various experts in the field this volume of thirteen original essays explores some of the most significant theoretical and practical fault lines and controversies in seventeenth century English literature The turn into the twenty first century is an appropriate time to take stock of the state of the field and as part of that stock taking the need arises to assess both where literary study of the early modern period has been and where it might desirably go Hence many of the essays in this collection look both backward and forward They chart the changes in the field over the past half century while also looking forward to more change in the future Some of the essays collected here explore the points of friction vulnerability and division that have emerged in literary study of all periods at the end of the twentieth century such as theory gender sexuality race and religion Others are more narrowly focused on fault lines and controversies peculiar to the study of Renaissance and seventeenth century literature At the same time nearly all of these essays examine and illuminate particular works of literature They engage theory but they also illustrate their points concretely by enacting practical criticism of works by authors ranging from Bacon to Milton What emerges from the collection is a sense of the field's dynamism and vitality The dominant mood of the essays is a cautious optimism and while the contributors are by no means complacent they all share a belief that the fault lines that have emerged in the field are variously and valuably instructive By exposing these fault lines the essayists seek a means of acknowledging differences and disagreements without covering them up They also constructively suggest ways of addressing the issues as a prerequisite to bridging them By broaching some of the most significant questions that animate the study of early modern literature at the turn into a new century this volume will be of great value to any student or scholar of seventeenth century literature
