### **Full Upright and Locked Position Mark**

Gerchick, 2013-06-03 Sit back relax and enjoy the flight our pilots still intone But who are they kidding Former FAA chief counsel and senior aviation policy official Mark Gerchick unravels the unseen forces and little known facts that have reshaped our air travel experience since September 11 2001 With wry humor and unique insight Gerchick takes us past the jargon technicalities and all is well platitudes to expose the new normal of air travel from the packed planes and myriad hassles of everyday flying to the alchemy of air fares the airlines endless nickel and diming and the elusive hope of escape from steerage We find out what pilots do in the cockpit what's really worth worrying about when it comes to airline safety and why we get sick on planes Meanwhile Gerchick ponders the jarring disconnect between our quaint expectations of service with a smile and the grim reality of cramped seats no free lunch and watch yer knees With sympathy for both fliers and airlines Gerchick shows how the new business all business airline industry has finally learned to make money even in the face of crushing fuel costs and get millions of travelers where they're going every day safely and quickly From his singular vantage point as former aviation regulator and policymaker Gerchick gives us a straightforward insider's view of how hard it is for government to improve the traveler's lot by explaining the vagaries of consumer protection rules as well as the political realities and the economic forces at work While Gerchick offers reasons to hope for a better future in air travel he presents an unvarnished look at what we can expect good and bad when we take to the skies Some of it will reassure you some will make you cringe but all will open your eyes to what it means to fly today

 Aviation remains one of the most active and challenging domains for human factors and applied psychology Since 1981 the  
 biennial International Symposium on Aviation Psychology ISAP has been convened for the purposes of a presenting the latest  
 research on human performance problems and opportunities within aviation systems b envisioning design solutions that best  
 utilize human capabilities for creating safe and efficient aviation systems and c bringing together scientists research  
 sponsors and operators in an effort to bridge the gap between research and application Though rooted in the presentations of  
 the 17th ISAP held in 2013 in Dayton Ohio Advances in Aviation Psychology is not simply a collection of selected proceeding  
 papers Based upon the potential impact on emerging trends current debates or enduring issues present in their work select  
 authors were invited to expand on their work following the benefit of interactions at the symposium The invited authors  
 include the featured keynote and plenary speakers who are all leading scientists and prominent researchers that were  
 selected to participate at the symposium These contributions are supplemented by additional contributors whose work best  
 reflects significant developments in aviation psychology Consequently the volume includes visions for the next generation of  
 air management and air traffic control the integration of unmanned i e remotely piloted vehicles into operational air spaces  
 and the use of advanced information technologies e g synthetic task environments for research and training This book is the  
 first in a series of volumes to be published in conjunction with each subsequent ISAP The aim of each volume is not only to  
 report the latest findings in aviation psychology but also to suggest new directions for advancing the field **757 Flight**
