 Ahlers,2016-03-02 The simultaneous operation of all systems generating moving or removing heat on an aircraft is simulated
 using integrated analysis which is called Integrated Energy System Analysis IESA for this book Its purpose is to understand
 optimize and validate more efficient system architectures for removing or harvesting the increasing amounts of waste heat
 generated in commercial and military aircraft In the commercial aircraft industry IESA is driven by the desire to minimize
 airplane operating costs associated with increased system weight power consumption drag and lost revenue as cargo space is
 devoted to expanded cooling systems In military aircraft thermal IESA is also considered to be a key enabler for the
 successful implementation of the next generation jet fighter weapons systems and countermeasures This book contains a
 selection of papers relevant to aircraft thermal management IESA published by SAE International They cover both recently
 developed government and industry funded thermal management IESA such as the Integrated Vehicle Energy Technology
