COLE, 2021-03-30 Launched in 1955 yet looking like a sci fi design proposal for a future then undreamed of Flaminio Bertoni's ellipsoid sculpture with wheels that was the Citroën DS stunned the world There

was a near riot at the 1955 Paris Motor Show launch of the car orders flooded in for this the new big Citroën a Voiture a Grande Diffusion or VGD as the car that replaced the legendary Traction Avant range The term DS stems from two Citroën parts of nomenclature the type of engine used as the 11D D and the special hemispherical design of the cylinder head as Culasse Special S DS out of Deesse or Goddess was a more popular myth of DS origination but an erroneous one But it was not just the car's aerodynamically advanced body shape Cd 0.37 that framed the genius of the DS hydro pneumatic self levelling suspension advanced plastics and synthetics for the construction of the roof and dashboard fascia and amazing road holding and cabin comfort were some of this car's highlights Only the lack of an advanced new engine was deemed a missed opportunity In fact Citroën had created a new engine for the car but lacked the resources to produce it in time for 1955 DS was a major moment in the history of car design one so advanced that it would take other auto manufacturers years to embrace Yet DS in its aero design was the precursor to today's low drag cars of curved form Manufactured worldwide used by presidents leaders diplomats farmers and many types of people the DS redefined Citroën its engineering and design language and its brand for decades to come Prone to rust not the safest car in the world and always lacking a smoother powerplant the DS still became an icon of car design Reshaped with a new nose and faired in headlamps in 1967 DS remained in production until 1975 Across its life DS spawned an estate car variant as the Safari a range of limousines two door convertibles and even coach built coupes and rally specials This car was a product design that became an article of social science it was that famous and it defined a European design movement upon a global stage then packed with me too copyist designs The DS or Goddess as it was tagged was a tear drop shaped act of French confidence in a world of the regurgitation of the known Some argue that DS and its effect has never been surpassed This new value for money book provides innovative access to the design history and modelling of the revolutionary DS one of the true greats of motoring history and a contemporary classic car of huge popularity

The New Citroën Building the Largest Service Station in the World Citroën Cars Ltd,1923 **Citroën DS** Malcolm Bobbit,2005 The most radical of Citroën's idiosyncratic offerings the DS was sensational when it was introduced in 1955 Twenty years and 1.45 million cars later it was still technically advanced to most other cars Revolutionary in driving characteristics and comfort it remains one of the most innovative cars of all time Original Citroën DS John Reynolds,2019-01-29 The Citroën DS was launched in 1955 and continued for 20 years It remains highly collectible and desirable for enthusiasts of European auto As with all of our Original titles this book aims to guide collectors restorers and enthusiasts through the various production changes between model years to make sure their restoration or prospective purchase is correct original and legitimate With thorough text and detailed photography every part of the car is cataloged 'D' Vehicles Société anonyme André Citroën, *Citroën DS & ID* R.M. Clarke,1994-04-11 A compliment to the earlier Road Test book and does not repeat any of the articles The DS was a completely new concept in car design and construction A high pressure hydraulic system lay at its heart and was radically

different from anything else on sale The simpler ID was introduced to lure customers away from more conventional cars At the end of production the styling was still fresh and unusual and the suspension a revelation to drivers is probably only bettered by the modern Citroens This is a book of contemporary road and comparison tests specification and technical data model introductions long term reports rebuild advice and a historical overview Models covered include DS19 ID19 ID Safari Wagon Connaught GT DW DS21 Pallas Safari Confort 21 3DS DS20 DS21 Pallas Efi 139 *The Goddess--La Déesse* Christian Sumi,2020-04 A celebration of the beloved Citro n DS icon of screen street and style through drawings photos and ephemera From the moment of its debut in 1955 the Citro n DS was a sensation and a magnet for movie stars designers philosophers and politicians alike No other automobile was able to combine form and technology so coherently and seemingly effortlessly Radical in its implementation and revolutionary in terms of comfort and safety the DS is one of the most innovative design icons of the 20th century In collaboration with Lars M ller Publishers the Swiss architect Christian Sumi published the new edition of AS in DS Alison Smithson in DS in 2001 In this new book he examines the characteristics of this classic vehicle such as the body the chassis or the legendary hydraulics which he documents in carefully arranged picture series and with drawings by Flaminio Bertoni and the Citro n design team Using image essays from advertising campaigns for the Citro n DS Sumi critically examines its reception and iconization along with theories that discuss the phenomenon in both a contemporary and philosophical context Citroen DS & ID 1955-1975 R.M. Clarke,1988-12-12 In the 20 years of production there were innumerable combinations of the saloon estate and Drophead with a wide choice of engine gearbox and finish 1966 brought the cessation of the CKD production at Slough the cars then being imported direct from France A major body change occurred in 1967 when the headlights were faired in with plastic covers and in 1969 the fuel injected DS21 was launched In Britain the end of the D came officially in April 1975 This is a book on contemporary road and comparison tests specification and technical data model introductions buying guide and historical overview Models covered include DS19 ID19 ID19 de Luxe Connaught ID Wagon Safari GT DW DSM ID Super Pallas M DS21 Pallas ID20 Berline Confort D19 Special DS23 Pallas Efi *Citroën DS* Malcolm Bobbitt,1999 When the Citroen DS was unveiled at the 1955 Paris Motor show it took the motoring world by storm Its futuristic shape was likened to a space ship and even 20 years later when it went out of production it was still one the most visibly and technically advanced cars of its day In this illustrated history of the car Malcolm Bobbitt recalls the long career of this extraordinary car and suggests why it became an icon of automobile design He uses 240 historical photographs to show its long development starting with the first design studies made before World War II and the first prototype of 1952 The book chronicles the production history of the DS and its less sophisticated sister car the ID and it seeks to explain the many facets of this complex idiosyncratic vehicle The author also describes how this reliable family saloon proved to be a formidable rally contender and for a generation provided formal transport for the French president and government
