Ultimate How To Write A 2025:

Digital Games eBook GURMEET SINGH DANG, *Salt Journals* Haifa Zangana, Christalla Yakinthou, Virginie Ladisch, 2024-12-20 *Salt Journals* is a compelling collection of essays by Tunisian women sharing their personal experiences with dictatorship and oppression. While rooted in the history and culture of Tunisia, these narratives reflect universal feelings of isolation, pain, and the indomitable quest for freedom. Drawn from a variety of different professions including a lawyer, an engineer, a nurse, a student, and a city council member, among others, these women are contesting the culture of silence surrounding women's prison narratives. Employing words as their weapons of nonviolent resistance, the authors recount the harsh realities of a militarized state and its oppressive prison system. Their creative defiance against state repression emerges not just as a means of survival but as a profound act of dissidence, reclaiming control from the brutality imposed upon their lives. A testament to the power of self-representation, *Salt Journals* opens a vital space for dialogue on the necessity of empathy, resilience, and the importance of speaking out in the face of tyranny.

[Humanising Language Education in the Generative Artificial Intelligence Age](#) Jérémie Bouchard, 2026-01-26 Examining the presence and influence of GenAI in the contexts of English for Academic Purposes (EAP) and written composition within university level English as a foreign language (EFL) programmes, this book asserts a humanist view of language education informed by critical realism and the social realist philosophy of education. Jérémie Bouchard looks at the GenAI language education interaction through explicit philosophical engagement with the aim of strengthening a critical and emancipatory approach to EAP written composition and language education. By highlighting technological determinism and relating it to broader neoliberalist mechanisms, the book provides new insights into the social, political, economic, cultural, and historical contexts within which the use of GenAI technologies by language teachers and learners can be understood. *Humanising Language Education in the Generative Artificial Intelligence Age* will appeal to students and scholars of linguistics, education, and sociology, as well as organisations devoted to understanding the evolution, application, and impact of GenAI on education and language learning.
