

BULLYING.

By: Kristine Laurio & Hermina Palacios

6th Period

Bullying isn't just punching someone in the face or someone calling you names. Bullying is a lot more than that. There are different types of bullying. Here are some examples, physical, verbal, indirect, social alienation, and cyber bullying. Did you know that an estimated 200 million children and youth around the world are being bullied? It's true that much people are being bullied.

Physical bullying is any kind of physical contact that could hurt someone. Like punching, pushing, kicking, hitting, and more. For example, if someone came up to you and shoved you to the ground that would be physical bullying. If someone just punched you in the face it would be physical bullying. Even if someone's poking you and you don't like it that's physical bullying.

Verbal bullying is name calling, making offensive remarks, or joking about someone's race, religion, social status, gender, or the way that they look. 46.5% of bullying in schools is verbal bullying. If someone made fun of the way you look that's verbal bullying. If someone called you stupid that's verbal bullying. Verbal aggression is when a bully teases someone. It is also making verbal threats of violence or aggression against someone's personal property.

Indirect bullying is spreading rumors about someone, gossiping about it, and excluding others from groups. Indirect bullying is 18.5% of all bullying. If you spread a rumor about a girl in class just because you thought it was funny or if it was because you didn't like her that would be indirect bullying.

Social alienation is when a bully excludes someone from a group on purpose. It also includes spreading rumors, or pointing out someone else's differences. For example if a group of people didn't want to hang out with this girl from their class because they thought she was weird, that would be social alienation.

Intimidation is when a bully threatens or intimidates someone else enough to get the person to do what they want. For example if you told a person to give you money or

"The School Shooting Epidemic: Who Is Behind School Shootings?" Robert Kirk,101-01-01 Robert Kirk s The School Shooting Epidemic Who Is Behind School Shootings is not merely a journalistic investigation it is at once an intellectual thriller a documentary narrative and a philosophical manifesto From the very first pages the author takes the reader by the hand and leads them into the abyss into that dark corner of modern civilization where fear information and technology intertwine into a deadly knot Kirk begins with what seems familiar to everyone school tragedies that have become so frequent in recent years that news of them often no longer provokes surprise He describes this phenomenon not as a series of random incidents or the outcome of isolated personal dramas among teenagers but as a managed epidemic with sources of infection methods of transmission and defined objectives His analysis follows the cold methodical logic of a researcher investigating not a crime but a global virus Kirk examines school shootings as a new form of informational terrorism deliberately embedded in the modern media landscape He shows how society responds to each tragedy in a predictable cycle fear panic political blame new restrictions and the curtailment of freedoms And he asks the central question who gains from this Rather than repeating the usual clich s about bullying weapons and video games Robert Kirk reveals a complex network of influences linking Columbine to Waco Oklahoma City and to more recent attacks in Russia and beyond He meticulously constructs a logical chain connecting these events as stages in a single evolution from early experiments to the global spread of a virus of violence The deeper he delves the clearer it becomes this is not merely about individuals breaking under social pressure but about the deliberate programming of consciousness by anti cultists who turn adolescents into controlled soldiers of an invisible war One of the book s key concepts is puzzle coding Kirk introduces this term to describe how anti cultists through media music games and social networks implant fragmented ideas and symbols in young minds fragments that gradually assemble into a coherent pattern of violence This is not brainwashing in the conventional sense it is a viral culture that plants puzzles of killer glorification the romanticization of death and a sense of superiority When these elements converge an individual may no longer distinguish

between their own thoughts and an implanted program Kirk insists that the true weapon is not the gun in the shooter's hands but the idea sown in their mind The book goes beyond America Entire chapters are devoted to how the school shooting virus crossed oceans and began eroding the social immunity of other nations including Russia Here the author draws attention to a disturbing synchronization the surge of attacks in the U S coincides with a wave of violence in Russian schools as if someone pressed the same button on different continents Kirk compels readers to reflect on what we often overlook how news is shaped who defines heroism and madness and who manipulates the emotions of millions The School Shooting Epidemic is a book that makes it impossible to see the world the same way again It is a documentary investigation for those who seek to understand why humanity has fallen into the trap of its own informational progress Kirk dismantles comfortable myths exposes the hidden mechanisms of mass consciousness control and shows that the real battle is not for weapons but for minds If we fail to recognize this virus today it will come for our children tomorrow *Principles of Cyberbullying Research* Sheri Bauman, Donna Cross, Jenny L. Walker, 2013 In 2010 the International Cyberbullying Think Tank was held in order to discuss questions of definition measurement and methodologies related to cyberbullying research This book is the product of their meetings and provides researchers with a clear set of principles to inform their work on cyberbullying **Predicting Cyberbullying** Christopher Paul Barlett, 2019-04-06 Predicting Cyberbullying Research Theory and Intervention delves into the theoretical advances that have been made to predict cyberbullying perpetration It examines myriad psychological and communication based theories discusses the relevant research to support or not each theory and elucidates the strengths and limitations of these theories Moreover the book differentiates cyberbullying from traditional bullying to expand on a theory that takes such differences into account to predict perpetration In addition it adapts interventions to address these nuanced theoretical advancements and concludes with an examination of validated psychological theories that can inform interventions and reduce cyberbullying The book is an effective and concise reference for psychologists school administrators counselors and psychological researchers looking to understand theory and interventions for cyberbullies Focuses on the cyberbully perpetrator Balances theory with interventional applications Identifies key risk factors in those who cyberbully Explores the scope of theoretically driven hypotheses specific to cyberbullying **Cyberbullying** Trijntje Völlink, Francine Dehue, Conor Mc Guckin, 2015-10-23 The study of cyberbullying has exploded since its first appearance in a peer reviewed journal article in 2005 Cyberbullying From theory to intervention aims to make clear and practical sense of this proliferation of coverage by defining the problem of cyberbullying and examining its unique features The volume provides a thorough overview of state of the art research into the phenomenon and discusses the development and evaluation of interventions to prevent and combat it Whereas most research papers offer limited space to describe actual intervention methods this book provides tremendous insight into the different theoretical methods and practical strategies available to combat cyberbullying Part One provides readers with a critical review of the existing research literature and collects insights from international

researchers involved in bullying and cyberbullying research tackling key questions such as how is cyberbullying defined what is the overlap with traditional bullying and what are the negative consequences of cyberbullying Part Two gives an overview of the development and content of evidence based ICT interventions aimed at preventing and combating bullying and cyberbullying In addition some of the important outcomes of the effect evaluations will be described The book s final chapter integrates the information from Part One with advice regarding practical applications from Part Two Cyberbullying From theory to intervention is essential reading for academics and researchers concerned with both cyberbullying and traditional bullying It can be used in graduate seminars or advanced undergraduate courses in cyberbullying and will also be of interest to teachers field experts and organisations involved and disseminating cyberbullying solutions *Exploring Cyberbullying in the College-age Population* Priya A. Pandit, 2016 ABSTRACT In recent years cyberbullying has become a topic of much interest and research focus For the purposes of this study cyberbullying includes the use of electronic communication to harass or express threat to another individual s in the form of malicious text and or visual graphics Many researchers have aimed to distinguish it from traditional bullying The majority of cyberbullying research to date has focused upon an adolescent population however there has been a wide gap in the literature as it relates to the college age population Studies that have examined college age individuals have also found significant variance in prevalence rates ranging between 8 6 55 3% The present study explores the experience of cyberbullying among a college age population specifically outlining the types of cyberbullying modalities through which it occurs negative impacts experienced styles of coping used resources aware of resources accessed gender differences and differences based upon religiosity This study also looks at perceptions of cyberbullying among those individuals who do not identify as cyber victims Results indicate that similar to previous literature the majority of cyberbullying was experienced prior to college mostly within high school Additionally in line with past research the results on the role of gender are mixed Further results indicate that participants endorsed the complete range of impact types more frequently applied an approach oriented coping method and while the majority of participants report awareness of resources this was not correlated to accessing them Other results indicated that while the majority of participants reported some type of religious affiliation religiosity did not have a significant relationship among the variables
