Regeneration of Abandoned Spaces: A New Design Approach Luciano Crespi, 2024-09-24 Our urban landscapes are filled with leftovers abandoned buildings and unused spaces remnants of industrial decline and societal transformations Regeneration of Abandoned Spaces A New Design Approach investigates how design and architecture can revitalize these neglected areas transforming them into dynamic livable environments This book is organized into three parts each providing a comprehensive framework for addressing this multifaceted challenge Part One explores the dynamic nature of modern living spaces and how interior design can adapt to the fluid lifestyles of contemporary nomads It delves into advanced drawing techniques that capture the intricate complexities of these evolving environments Part Two focuses on the philosophical aspects of design particularly within exhibition design examining how unfinished spaces can evoke deep emotional responses It explores the role of temporary installations in revitalizing urban areas demonstrating how ephemeral interventions can catalyze long term renewal The final section Part Three addresses the concept of unfinished design in architecture showcasing successful projects from around the world It emphasizes the aesthetic and functional benefits of embracing imperfections and repurposing abandoned spaces This part provides practical strategies and inspiring examples illustrating how adaptive reuse and incompleteness can lead to sustainable and inclusive urban regeneration Regeneration of Abandoned Spaces A New Design Approach is an essential resource for professionals urban planners and anyone passionate about urban architecture and renewal Combining theoretical insights with practical guidance it equips readers with the tools and knowledge needed to reimagine and reconstruct our cities fostering a more sustainable and inclusive future

Cyberpunk Handbook St. Jude, R. U. Sirius, Bart Nagel, 1996 **Ethical Artificial Intelligence from Popular to Cognitive Science** Jordan Richard Schoenherr, 2022-06-24 This book offers a unique interdisciplinary perspective on the ethics of artificial intelligence autonomous intelligent and connected systems or AISs applying principles of social cognition to understand the social and ethical issues associated with the creation adoption and implementation of AISs As humans become entangled in sociotechnical systems defined by human and artificial agents there is a pressing need to understand how trust is created used and abused Compounding the difficulty in answering these questions stakeholders directly or indirectly affected by these systems differ in their motivations understanding and values This volume provides a comprehensive resource to help stakeholders understand ethical issues of designing and implementing AISs using an ethical sensemaking approach Starting with the general technical affordances of AIS Dr Jordan Richard Schoenherr considers the features of system design relating data integrity selection and interpretation of algorithms and the evolution processes that drive AISs innovation as a sociotechnological system The poles of technophobia algorithmic aversion and technophilia algorithmic preference in the public perception of AISs are then described and considered against existing evidence including issues ranging from the displacement and re education needs of the human workforce the impact of use of

technology on interpersonal accord and surveillance and cybersecurity Ethical frameworks that provide tools for evaluating the values and outcomes of AIs are then reviewed and how they can be aligned with ethical sensemaking processes identified by psychological science is explored Finally these disparate threads are brought together in a design framework Also including sections on policies and guideline gaming and social media and Eastern philosophical frameworks this is fascinating reading for students and academics in psychology computer science philosophy and related areas as well as professionals such as policy makers and those working with AI systems

Metaverse For Beginners 2023 Justin Sonnen,2022-02-03 When people talk about the future they usually mean virtual reality The reason is that when you say the future most people think of science fiction and nearly all SF takes place in a virtual space The word metaverse is actually an old term for cyberspace the virtual environment that exists on computers So you could argue that the metaverse and cyberspace are virtually the same things The word metaverse originally meant just one thing a synonym for the word universe Now it means a lot of things some contradictory Metaverse has the slick ring of the future around it but in reality it refers to past or present realities not just a future vision The term is thrown around so much that you can't trust what it means What we call the metaverse might be better termed the internet on steroids or something more accurate and less sexy sounding The metaverse is a little bit like virtual reality except not quite It's a confusing term these days That's because in the 90s Neal Stephenson of Snow Crash fame imagined the metaverse as a network of connected 3D spaces that users could interact with using VR goggles and haptic feedback devices The metaverse is the general term for all digital universes being connected We are just starting to build these worlds and it's easy to get sidetracked by the technologies that we're using to build them which are sometimes quite new Just as an aside remember how every startup in 1983 used a Commodore 64 as its main computer Even with that amazing machine no one really predicted anything like what the internet would become Hey everyone I'm doing a think piece that looks at the future of VR I'm really interested to hear from people on this one What would you like technology to do for you in the metaverse What new activities and experiences do you most want developing The main aim of this piece is to get a better understanding of what we actually want the future to be The metaverse could be anything you imagine it to be It's the virtual world of your imagination By thinking about what you want it to be you will shape it with your actions The metaverse can't become real until someone builds it with code Until then the metaverse is whatever we imagine it to be while we are building it together
