Niemi,Jane Junn,2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching **Civic Education & Culture** Bradley C. Civic Education in the Elementary Grades Dana Mitra, Stephanie C. Serriere, 2015-10-16 Based on a 5 year study of an elementary school with socioeconomic diversity the authors provide an active model of civic engagement organized into three settings Classroom School and Community Each chapter includes an overview of what research has demonstrated about civic engagement in that particular space offers detailed descriptions of activities and closes with lessons for practice This case study demonstrates how putting civics at the center of the curriculum gives purpose and motivation to traditional academic learning including tested subjects such as reading writing and mathematics As former elementary school teachers the authors focus on what is possible in schools rather than a romantic vision of what schools could be Classroom teachers school principals community members and teacher educators can use this resource to foster a deeper richer understanding of what is entailed in civic life

Hess,2012-10-01 By nearly every measure Americans are less engaged in their communities and political activity than generations past So write the editors of this volume who survey the current practices and history of citizenship education in the United States They argue that the current period of creative destruction when schools are closing and opening in response to reform mandates is an ideal time to take an in depth look at how successful strategies and programs promote civic education and good citizenship Making Civics Count offers research based insights into what diverse students and teachers know and do as civic actors and proposes a blueprint for civic education for a new generation that is both practical and visionary Project Citizen We the People-- Project Citizen,Center for Civic Education (Calif.),National Conference of State Legislatures,2010 *The Civic Education of American Youth* Policy Research Project on Civic Education Policies and Practices,Kenneth W. Local Civics with National Purpose J. Spencer Clark,2021-02-03 This book examines the development of civic education in the United States through the lives of two teachers at Shortridge High School SHS in Indianapolis around 1900 After situating civic education at the turn of the century the book describes the career of Laura Donnan her influences teaching extracurriculars and civic life through the lens of her unique epistemology shaped by negotiating the gendered ideologies of her era Then the book re examines Arthur W Dunn s career focusing on his ten years at SHS and the influence of Donnan on

his popular community civics curriculum and subsequently the 1916 report *The Social Studies in Secondary Education*. Previous scholars have overlooked Dunn's time at SHS viewing it simply as a stepping stone for the progressive educator's career. This book argues that Dunn's time at SHS was pivotal to his career due to influential colleagues primarily Donnan. To conclude Clark discusses the implications of Donnan's epistemology in shaping civic education in the United States. Civic Education in the Age of Mass Migration Angela M. Banks, 2021. This important book offers a more inclusive approach to preparing students to be responsible participants in a democratic society. Civic education generally operates through the lens of citizenship where students learn what good citizenship is and what good citizens do. Yet the citizenship lens fails to identify the wide range of school children and their families who participate in economic, political, and social life. *Civic Education in the Age of Mass Migration* examines the exclusionary aspects of citizenship and offers democratic societies an alternative approach that includes all long-term residents regardless of citizenship and immigration status. Banks reimagines a civic education curriculum that gives students the knowledge and skills they will need to assist the United States in becoming a more perfect union. **Book Features:** A brief overview of the history of civic education and why citizenship status and immigration status should be explicitly addressed. An examination of the economic, political, and social forces shaping immigration law. A new way to conceptualize membership based on three principles: popular sovereignty, participation, and the *jus nexi* principle. Classroom activities and discussion questions to help civic educators incorporate the idea of citizenship boundaries into their curriculum. We the People, 2016. *Making Citizens* Beth C. Rubin, 2012. *Making Citizens* illustrates how social studies can recapture its civic purpose through an approach that incorporates meaningful civic learning into middle and high school classrooms. Making Better Citizens Civic Education Foundation, Cambridge, Mass, 1952.
