Advanced Methods For How To Start Ai Tools 2025:

Advanced Methods, Equipment and Platforms in Precision Field Crops Protection, volume II Jun Ni, Peter Yuen, Jingcheng Zhang, Ning Yang, 2025-11-05 Diseases pests and weeds have severely affected the production of crops Traditional agriculture solves the above problems by large scale chemical spraying but excessive pesticides can also seriously affect the growth of crops and pollute the environment Therefore it is necessary to use modern technologies to protect field crops accurately Collect and analyze the characteristics and location information of diseases pests and weeds as early as possible with equipment and methods and use various platforms to complete the precise protection of field crops This Research Topic welcomes submissions that address precision crop protection research and demonstrate how smart control strategies sensor technology and operational platforms can be integrated into actual crop protection We welcome submissions of original research articles reviews and methods including but not limited to research on the following sub themes 1 Real time monitoring and detection sensors for diseases pests and weeds 2 Intelligent crop protection methods based on artificial intelligence 3 Phenotypic parameter analysis of weeds and affected crops 4 Precision variable rate equipment and system for crop protection 5 Digital twin models novel IoT technologies and cloud platform for crop protection 6 Advances innovations and new trends in modern technologies for crop protection and development **AI's Role in Enhanced Automotive**

Safety Vyas, Vikas, Bi, Xiaowei, Pandey, Digvijay, Xu, Zheyuan, Pandey, Binay Kumar, 2025-05-01 Artificial intelligence AI plays a transformative role in enhancing automotive safety revolutionizing how vehicles prevent accidents and protect passengers By integrating advanced sensors real time data analysis and machine learning algorithms AI enables cars to detect hazards predict potential collisions and respond fast From driver assistance features like automatic emergency braking and lane assistance to the development of fully autonomous vehicles AI reshapes the landscape of road safety As technology evolves AI's role in minimizing human error and improving safe smart transportation begs further exploration AI's Role in Enhanced Automotive Safety explores AI driven advancements in automotive safety highlights possible obstacles to widespread adoption and offers policy suggestions It examines the possible impacts of AI driven technology on vehicle safety This book covers topics such as deep learning neural networks and sensor technology and is a useful resource computer civil and mechanical engineers automotive business owners urban developers academicians researchers and data scientists

Beyond and After Prompt Engineering: The Future of AI Communication Vladimir Geroimenko, 2025-12-02 This pioneering book offers both a practical guide and a conceptual manifesto for rethinking our relationship with AI exploring the future of AI communication and moving beyond traditional prompt engineering towards more natural intuitive multimodal and context aware interactions It examines the personal cultural ethical and philosophical aspects of AI communication providing insights into how machines can comprehend context establish rapport exhibit emotional intelligence and collaborate effectively with humans The book outlines the key communication principles essential for ensuring clarity trust

adaptability and mutual understanding in increasingly complex human AI dialogues Structured across 16 chapters and organised into three parts conceptual foundations communicative principles and future trajectories this volume combines in depth analysis with numerous real world examples and forward looking scenarios It is richly illustrated with 142 conceptual diagrams that clarify complex ideas and serve as visual companions to the narrative Covering both near term advancements and long term speculative trends this book serves as an essential guide for AI developers practitioners educators students and anyone interested in communicating more effectively with increasingly sophisticated AI systems □*Conformal*

Prediction for Enhanced Reliability in Medical Diagnosis AI Etienne Noumen, The book discusses Conformal Prediction CP as a method for enhancing the reliability of AI in medical diagnosis by providing rigorous uncertainty quantification It explains that unlike traditional AI which gives single predictions CP produces a set of possible outcomes with a guaranteed probability of containing the true answer addressing the critical need for trustworthy AI in healthcare The text explores the foundational concepts of CP compares it to other uncertainty quantification techniques highlights advanced CP methods for more nuanced guarantees and surveys its diverse applications in medical imaging genomics clinical risk prediction and drug discovery Finally it examines the challenges of clinical integration the need for human AI interaction and the ethical and regulatory dimensions positioning CP as a vital tool for the safe and effective deployment of AI in medicine despite requiring further research and adaptation for practical success □Advances in Computational Intelligence for Climate Change Security and Sustainability

Shah, Imdad Ali, Jhanjhi, N.Z., 2025-07-17 Artificial intelligence AI contributes to the fight against climate change Existing AI systems include tools that predict weather track icebergs and identify pollution Sustainability transitions transform major socio technical systems of provision and use in areas such as energy water mobility and food towards more sustainable ways of production and consumption This multi disciplinary field has inputs from economics science and technology studies engineering computer science business intelligence and more Along with sustainability systems and security have become integral parts of the infrastructure and economies of various countries Advances in Computational Intelligence for Climate Change Security and Sustainability serves as a source of innovation exploring complexities of computational intelligence in energy water mobility pollution predicting weather environment and agriculture It examines sustainable ways of production and consumption while providing a roadmap for overcoming the limitations posed by small sample sizes Covering topics such as environmental control solar mirror durability performance management this book is an excellent resource for computer scientists meteorologists environmentalists engineers economists researchers academicians and more □*The 7th International Conference "Nanotechnology" (GTUnano)* Levan Chkhartishvili, Mikheil

Chikhradze, Laszlo Kotai, 2025-12-03 Selected peer reviewed extended articles based on abstracts presented at the 7th

International Conference Nanotechnology GTUnano2024 Aggregated Book □**Self-regulatory Writing Strategies and**

Second Language Writing Proficiency Li Dong, 2026-02-04 This volume examines how second language learners develop

effective writing skills through self regulated learning by focusing on four key dimensions of writing strategies cognitive metacognitive motivational regulation and social behavior Drawing on research from diverse global and regional second language contexts the book presents a comprehensive multidimensional framework explaining how learners regulate their writing processes and how developing writing proficiency supports strategic learning It establishes fundamental theoretical foundations analyzes the impact of each strategy type explores the reciprocal relationships between strategies and illuminates how these interconnections evolve over time The book also bridges the gap between theory and practice offering educators practical strategies to foster strategic development in student writers This volume will be valuable for researchers students and practitioners in the fields of second language acquisition and writing pedagogy

subject Environmental Sciences Climate and environmental protection grade A language English abstract Agricultural conversion is a major reason for deforestation that affects the United States and is responsible for the loss of species soil depletion and global warming This work aims to analyze the use of AI for combating deforestation in the agricultural sector in the United States through improved surveillance risk assessments and policy modeling This proposed framework combines satellite imagery data agricultural records and selected socio economic factors and uses CNNs GBMs and ABMs to tackle deforestation systematically CNNs also showed an accuracy of 94% in the identification of the area of deforestation while the GBMs showed an accuracy of 0.92 AUC ROC in identifying hotspot areas Through ABMs that assumed policy changes such as reforestation incentives and fines for violators the study showed that deforestation rates could be cut by up to 25% Regression and correlation analyses and hypothesis testing proved significant predictors such as crop yield rainfall variability and the superiority of the models to conventional techniques The outcomes reveal that AI can offer an effective solution to increase food production and maintain forests at the same time This framework allows for the formulation of specific recommendations for policy initiatives because it incorporates empirical evidence Further research should improve the modularity the real time monitoring system and the access to the algorithm to further increase the impact of AI on sustainable land management and the chopping down of forests
