### **Donald Coughanowr 3rd Edition:**

Process Systems Analysis and Control Steven E. LeBlanc, Donald Coughanowr, 2009 Process Systems Analysis and Control third edition retains the clarity of presentation for which this book is well known It is an ideal teaching and learning tool for a semester long undergraduate chemical engineering course in process dynamics and control It avoids the encyclopedic approach of many other texts on this topic Computer examples using MATLAB and Simulink have been introduced throughout the book to supplement and enhance standard hand solved examples These packages allow the easy construction of block diagrams and quick analysis of control concepts to enable the student to explore what if type problems that would be much more difficult and time consuming by hand

**Intelligent Systems and Computer Technology** D. Jude Hemanth, S. Malathi, 2020-12-15 Recent developments in soft computation techniques have paved the way for handling huge volumes of data thereby bringing about significant changes and technological advancements This book presents the proceedings of the 3rd International Conference on Emerging Current Trends in Computing Next Generation Soft Computing is a platform for scientists researchers practitioners and academics to present and discuss their most recent innovations trends and concerns as well as the practical challenges encountered in the field The second section Evolutionary Networking and Communications focuses on various aspects of 5G communications systems and networking including cloud and virtualization solutions management technologies and vertical application areas It brings together the latest technologies from all over the world and also provides an excellent international forum for the sharing of knowledge and results from theory methodology and applications in networking and communications The book will be of interest to all those working in the fields of intelligent systems and computer technology
