*Learning in the Fast Lane* Chester E. Finn, Jr., Andrew E. Scanlan, 2021-05-11 More than three million high school students take five million Advanced Placement exams each May yet remarkably little is known about how this sixty year old privately run program has become one of U S education s greatest successes From its mid century origin as a tiny option for privileged kids from posh schools AP has also emerged as a booster rocket into college for hundreds of thousands of disadvantaged youngsters It challenges smart kids affects school ratings affords rewarding classroom challenges to great teachers tunes up entire schools and draws vast support from philanthropists education reformers and policymakers AP stands as America s foremost source of college level academics for high school pupils Praised for its rigor and integrity more than 22 000 schools now offer some or many of

its thirty eight subjects from Latin to calculus art to computer science But challenges abound today as AP faces stiffening competition especially dual credit curriculum wars charges of elitism misgivings by elite schools and universities and the arduous work of infusing rigor into schools that lack it and academic success into young people unaccustomed to it In today s polarized climate can Advanced Placement maintain its lofty standards and overcome the hostility politics and despair that have sunk so many other bold education ventures Advanced Placement The Unsung Success Story of American Education is a unique account richly documented and thoroughly readable of the AP program in all its strengths and travails written by two of America s most respected education analysts **The Civic Textbook** Aleksandar Saša Zeković,2005 Learning the Ways of Democracy ,2012-05-01 **Civic Education** Richard G. Niemi,Jane Junn,2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching

**Civic Education for Diverse Citizens in Global Times** Beth C. Rubin,James M. Giarelli,2013-10-11 This book explores four interrelated themes rethinking civic education in light of the diversity of U S society re examining these notions in an increasingly interconnected global context re considering the ways that civic education is researched and practiced and taking stock of where we are currently through use of an historical understanding of civic education There is a gap between theory and practice in social studies education while social studies researchers call for teachers to nurture skills of analysis decision making and participatory citizenship students in social studies classrooms are often found participating in passive tasks e g quiz and test taking worksheet completion listening to lectures rather than engaging critically with the curriculum Civic Education for Diverse Citizens in Global Times directed at students researchers and practitioners of social studies education seeks to engage this divide by offering a collection of work that puts practice at the center of research and theory

**Transforming History** Mary Jo Festle,2020-04-14 Teaching history well is not just a matter of knowing history it is a set of skills that can be developed and honed through practice In this theoretically informed but eminently practical volume Mary Jo Festle examines the recent explosion of research on the teaching and learning of history Illuminated by her own work Festle applies the concept of backward design as an organizing framework to the history classroom She provides

concrete strategies for setting up an environment that is inclusive and welcoming but still challenging and engaging. Instructors will improve their own conceptual understandings of teaching and learning issues as well as receive guidance on designing courses and implementing pedagogies consistent with what research tells us about how students learn. The book offers practical illustrations of assignments, goals, questions, grading rubrics, unit plans, and formats for peer observation that are adaptable for courses on any subject and of any size. *Transforming History* is a critical guide for higher and secondary education faculty, neophytes and longtime professionals alike working to improve student learning.

**Vertical File Index**, 2002      *Congressional Record* United States. Congress, 2013      **Project Citizen** We the People-- Project Citizen, Center for Civic Education (Calif.), National Conference of State Legislatures, 2010      **Making Civics Count** David E. Campbell, Meira Levinson, Frederick M. Hess, 2012-10-01

By nearly every measure Americans are less engaged in their communities and political activity than generations past. So write the editors of this volume who survey the current practices and history of citizenship education in the United States. They argue that the current period of creative destruction when schools are closing and opening in response to reform mandates is an ideal time to take an in depth look at how successful strategies and programs promote civic education and good citizenship. *Making Civics Count* offers research based insights into what diverse students and teachers know and do as civic actors and proposes a blueprint for civic education for a new generation that is both practical and visionary.
