makes a persuasive case that we're neglecting the four core needs that energize great performance: sustainability, physical security, emotional self-expression, mental and significance, spiritual. Rather than running like computers at high speeds for long periods, we're at our best when we pulse rhythmically between expending and regularly renewing energy across each of our four needs. Organizations undermine sustainable high performance by forever seeking to get more out of their people. Instead, they should seek systematically to meet their four core needs so they're freed, fueled, and inspired to bring the best of themselves to work every day. Drawing on extensive work with an extraordinary range of organizations, among them Google, Ford, Sony, Ernst & Young, offset emotionally draining experiences with practices that fuel resilience, move between a narrow focus on urgent demands and more strategic creative thinking, and balance a short-term focus on immediate results with a values-driven commitment to serving the greater good. At the organizational level, he outlines new policies, practices, and cultural messages that Schwartz's client companies have adopted. *The Way We're Working Isn't Working* offers individuals, leaders, and organizations a highly practical, proven set of strategies to better manage the relentlessly rising demands we all face in an increasingly complex world. *New York Magazine*, 1989-12-11. *New York Magazine* was born in 1968 after a run as an insert of the *New York Herald Tribune* and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea. *The New Drawing on the Right Side of the Brain*, Betty Edwards, 1999-08-30. When *Drawing on the Right Side of the Brain* was first published in 1979, it hit the *New York Times* bestseller list within two weeks and stayed there for more than a year. In 1989, when Dr. Betty Edwards revised the book, it went straight to the *Times* list again. Now Dr. Edwards celebrates the twentieth anniversary of her classic book with a second revised edition. Over the last decade, Dr. Edwards has refined her material through teaching hundreds of workshops and seminars. Truly *The New Drawing on the Right Side of the Brain*, this edition includes the very latest developments in brain research, new material on using drawing techniques in the corporate world and in education, instruction on self-expression through drawing, an updated section on using color, detailed information on using the five basic skills of drawing for problem-solving. Translated into thirteen languages, *Drawing on the Right Side of the Brain* is the world's most widely used drawing instruction guide. People from just about every walk of life—artists, students, corporate executives, architects, real estate agents, designers, engineers—have applied its revolutionary approach to problem-solving. The *Los Angeles Times* said it best: *Drawing on the Right Side of the Brain* is not only a book about drawing; it is a book about living. This brilliant approach to the teaching of drawing should not be dismissed as a mere text. It emancipates. *Be Excellent at Anything*, Tony Schwartz, Jean Gomes, Catherine McCarthy, 2011-02. Offers strategies for enabling sustainable high performance by systematically investing in employee health and happiness, citing the vulnerabilities of common business practices while offering examples of effective
