The Motormaster V control is a motor speed control device that adjusts condenser fan motor speed in response to declining liquid refrigerant pressure. A properly applied Motormaster V control extends the operating range of air-conditioning systems and permits operation at lower outdoor ambient temperatures.

On 09DK units, the Motormaster V control is used in conjunction with the standard fan cycling controls. See Table 2A or 2B for the ambient temperatures at which the 09DK units operate without modification.

Motormaster V control cannot be installed with the high-static fan option.
