Routledge Handbook on Elections in the Middle East and North Africa Francesco Cavatorta, Valeria Resta, 2023-03-31 This Handbook analyzes elections in the Middle East and North Africa and seeks to overcome normative assumptions about the linkage between democracy and elections Structured around five main themes contributors provide chapters detailing how their case studies illustrate specific themes within individual country settings Authors disentangle the various aspects informing elections as a process in the Middle East by taking into account the different contexts where the electoral contest occurs and placing these into a broader comparative context The findings from this Handbook connect with global electoral developments empirically demonstrating that there is very little that is exceptional about the Middle East and North Africa when it comes to electoral contests Routledge Handbook on Elections in the Middle East and North Africa is the first book to examine all aspects related to elections in the Middle East and North Africa Through such comprehensive coverage and systematic analysis it will be a key resource for students and scholars interested in politics elections and democracy in the Middle East and North Africa

National Library of Medicine Audiovisuals Catalog National Library of Medicine (U.S.), **When People Come First** João Biehl, Adriana Petryna, 2013-07-07 A people centered approach to global health When People Come First critically assesses the expanding field of global health It brings together an international and interdisciplinary group of scholars to address the medical social political and economic dimensions of the global health enterprise through vivid case studies and bold conceptual work The book demonstrates the crucial role of ethnography as an empirical lantern in global health arguing for a more comprehensive people centered approach Topics include the limits of technological quick fixes in disease control the moral economy of global health science the unexpected effects of massive treatment rollouts in resource poor contexts and how right to health activism coalesces with the increased influence of the pharmaceutical industry on health care The contributors explore the altered landscapes left behind after programs scale up break down or move on We learn that disease is really never just one thing technology delivery does not equate with care and biology and technology interact in ways we cannot always predict The most effective solutions may well be found in people themselves who consistently exceed the projections of experts and the medical scientific political and humanitarian frameworks in which they are cast When People Come First sets a new research agenda in global health and social theory and challenges us to rethink the relationships between care rights health and economic futures

Access to Information in Africa Fatima Diallo, Richard Calland, 2013-06-15 For a long time Africa has lagged behind global advances in transparency but there are now significant developments on the continent In a ground breaking book Access to Information in Africa brings together for the first time a collection of African academics and practitioners to contribute to the fast growing body of scholarship that is now accumulating internationally This is therefore an African account of progress made and setbacks suffered but also an account of challenges and obstacles that confront both policy makers and practitioners

These challenges must be overcome if greater public access to information is to make a distinctive positive contribution to the continent's democratic and socio-economic future. This book offers a necessarily multi-dimensional perspective on the state of ATI in African jurisdictions and the emerging new praxis a praxis that will entail a genuine domestication of the right of access to information on the continent **Medical Sciences International Who's who Informa Healthcare, 1994**

The Right to Know Ann Florini, 2007-05-22 The Right to Know is a timely and compelling consideration of a vital question. What information should governments and other powerful organizations disclose? Excessive secrecy corrodes democracy, facilitates corruption and undermines good public policymaking but keeping a lid on military strategies, personal data and trade secrets is crucial to the protection of the public interest. Over the past several years, transparency has swept the world. India and South Africa have adopted groundbreaking national freedom of information laws. China is on the verge of promulgating new openness regulations that build on the successful experiments of such major municipalities as Shanghai. From Asia to Africa to Europe to Latin America, countries are struggling to overcome entrenched secrecy and establish effective disclosure policies. More than seventy now have or are developing major disclosure policies or laws. But most of the world's nearly 200 nations do not have coherent disclosure laws. Implementation of existing rules often proves difficult and there is no consensus about what disclosure standards should apply to the increasingly powerful private sector. As governments and corporations battle with citizens and one another over the growing demand to submit their secrets to public scrutiny, they need new insights into whether, how and when greater openness can serve the public interest and how to bring about beneficial forms of greater disclosure. The Right to Know distills the lessons of many nations' often bitter experience and provides careful analysis of transparency's impact on governance, business regulation, environmental protection and national security. Its powerful lessons make it a critical companion for policymakers, executives and activists as well as students and scholars seeking a better understanding of how to make information policy serve the public interest.
