Speech and Language Screener, 2014 Pocket-sized resource for initial screening tool to gather baseline data, identify areas of concern or monitor student progress. This non-standardized screener assesses many areas of speech and language including Articulation, Connected Speech, Following Directions, Grammar, Inferencing, Listening Comprehension, Phonological Awareness, Questions, Social Skills, Vocabulary. *Paperbound Books in Print*, 1984. **Children's Books in Print** R R Bowker Publishing, Bowker, 1999-12. **Coston-Reidenbach Articulation Quick Screening, Language Quick Screening** G. Norman Coston, Elizabeth Duke Reidenbach, 1978. Lemon and Lime Library Rebecca Palmer, Athanassios Protopapas, 2017-07-05 This comprehensive resource profiles the articulation ability of a client, identifies areas in particular need of treatment and provides the material and tools to create tailor-made practice worksheets. The downloadable resources generate word lists according to the linguistic and phonetic criteria defined by the therapist. Words can also be added to the Library by the therapist, allowing it to grow over time and to store a large number of words for articulation practice. Tailor-made lists of practice words and sentences as well as pictures and instructions can be designed and printed for individual clients or students. There are seven levels of articulation practice in the order of single sounds, consonant-vowel combinations, DDK rates, short words, multisyllabic words, short phrases with the target sound in one word and longer sentences saturated with the target sound. The work includes an articulation screening test using words not in the Library to indicate the areas of greatest difficulty and to assess the generalisation of articulation skills. This versatile resource can be used with adults or children and will be invaluable to speech language therapists, teachers and students of phonetics. **Articulation Screening Assessment** Jean G.
