Hansen, Cyrus Lakdawala, 2022-04-13 A fun tricky ambush weapon for Black against 1 e4 In this book the authors cover the exciting 1 e4 g6 2 d4 Nf6 which players like Magnus Carlsen Ian Nepomniachtchi Richard Rapport and other strong players have used with powerful effect to drag White players out of their comfort zones into Black's domain The authors are pulling games from many resources including their own experiments with the opening to illustrate how it is possible to beat titled players right out of the opening by shocking White's system and beliefs **Caruana:** Cyrus Lakdawala, 2018-11-07 Italian American grandmaster Fabiano Caruana is the perfect role model for any aspiring player Already a very strong grandmaster he announced his presence as a leading contender for the world title in 2014 when he scored an incredible 8/10 including seven straight wins from the first seven games in the Sinquefeld Cup in St Louis This was an elite event where he finished an astonishing three points clear of Magnus Carlsen whom he will challenge for the world title in late 2018 Caruana earned this right thanks to his fine victory in the Berlin Candidates where he scored 9/13 and finished a point clear of a world class field Caruana's style is universal He is a very dangerous attacking player who is also equally at home in quiet strategic positions or manoeuvring in an endgame In this respect he is the epitome of the modern grandmaster being a hard working and determined fighter who prepares thoroughly and plays with great determination and accuracy The Move by Move series provides an ideal format for the keen chessplayer to improve their game While reading you are continually challenged to answer probing questions a method that greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of chess knowledge Carefully selected questions and answers are designed to keep you actively

involved and allow you to monitor your progress as you learn This is an excellent way to study chess while providing the best possible chance to retain what has been learnt

Carlsen's Neo-Møller Ioannis Simeonidis,2021-03-25 The Ruy Lopez is one of the most important chess openings hugely popular with amateurs and masters and grandmasters alike Black players allowing the Ruy Lopez main lines will usually be condemned to passivity defending a slightly worse though solid position for as long as White chooses this situation to continue World Champion Magnus Carlsen doesn't like passivity He wants to be in the driver's seat and determine how his game develops Magnus likes unconventional and active systems that allow him to take command and put pressure on his opponent from early on That's why Magnus Carlsen and other players with him have revolutionized the old Møller Attack one of the sharpest and most uncompromising variations against the Ruy Lopez As yet largely disregarded and unexplored by the majority of players Carlsen's new approach allows Black to break free early and start giving White a hard time FIDE Master Ioannis Simeonidis is the first to cover this system in detail and make it easy to grasp for club players He has called it the Neo Møller Simeonidis has made lots of discoveries presents many new ideas and shows that it is a reliable and playable system Since the Neo Møller is a very early deviation from the main lines it's easy for Black to actually get it on the board and take opponents out of their comfort zone Simeonidis has created a compact accessible and inspirational book One thing looks certain White players of the Ruy Lopez are going to thoroughly dislike the Neo Møller

who became world chess champion in 2013 after defeating Viswanathan Anand Carlsen was from Norway Carlsen was a great strategist and endgame player How many of his moves can you guess Playing through Games Playing through master games is a proven method of improving One method is to take one side usually the winning side and guess the next move In the pre computer era this could be done by covering up the moves with a sheet of cardboard If you guessed correctly you will score With practice you will correctly predict more moves Doing so helps develop chess fluency One suggested approach was not to take too long on the moves say about 10 seconds or so You could score correct guesses If the move was totally unexpected then it would be a good time to see if you could understand why the move was played Every move should have a clear idea behind it If you cannot see the idea there is a learning opportunity there Here there is between one and four choices This is similar to a multiple choice exam This is easier than looking at all moves and may mean you examine some moves you would not have normally considered Diagrams This book has many large clear colour diagrams You do not need a chess set and board to read this book You do need to know how to read standard chess notation How to Score This book consists of games from World Championships with brief annotations for each move You may simply play over the games for their own sake To get the most out of this book you play through the games and take the role of the winning player The winning player will always be playing up the board Initially all the details of the games will be displayed For a number of opening moves you will not need to guess the move The number will vary from game to game and will generally be between 8 and 10 moves for each side After these opening moves have been played you will then try and predict the winning player s moves Your choice will be selected from a number of candidate moves If you guess correctly you will score points which will range from 0 to 6 You can either write down or otherwise keep track of your total score and see what category you reach Rating The score for each game will always be out of 100 Scores may vary from game to game so to get a consistent rating average your score over 10 games These are based on the FIDE The international chess federation rating system developed by Professor Elo The rating of 2500 is an approximation of the strength needed to be a Grandmaster After you have finished a game find what range your score is in the left column Your approximate rating is in the right column

91	100	2500	81	90	2400
2499	71	80	2200	2399	61
70	2000	2199	51	60	1800
1999	41	50	1600	1799	31
40	1400	1599	21	30	1200
1399	11	20	1000	1199	0
10	below 1000				

The challenge is to increase your rating with each game Further Books Depending on feedback I will publish further books in this series based on the following World champions Steinitz Lasker Capablanca Alekhine Euwue Botvinnik Smyslov Tal Petrosian Spassky Fischer Karpov Kasparov Anand Carlsen *Magnus Wins With White* Zenon Franco,2020-08 In Magnus Wins With White Grandmaster Zenon Franco deeply analyses 32 of Magnus Carlsen s most instructive games where he wins with the white pieces This book is written in move by move style a good training tool containing exercises and tests This format is a great platform for studying chess improving both skills and knowledge as the reader is continually challenged to find the best moves and the author provides answers to probing questions throughout

Most of the games are taken from Magnus's recent career including one from 2020 and eight from 2019. His opponents are nearly all super grandmasters and they include former world champions Viswanathan Anand and Vladimir Kramnik as well as Wesley So, Maxime Vachier-Lagrave, Alexander Grischuk, Levon Aronian, Boris Gelfand, and naturally Anish Giri. In the majority of these games, Magnus demonstrates his ability to outplay his opponents in the middlegame by simply making stronger moves and applying constant pressure that eventually forces the opponent to crack and play weaker moves. In some games, however, this takes place in the endgame. A second book, *Magnus Wins With Black*, is forthcoming. With a foreword by Magnus Carlsen's Chief Second and Coach Peter Heine Nielsen.
