Challenger Operators Manual 1998:

The Software Encyclopedia 2000 Bowker Editorial Staff, 2000-05 **Flashbulb Memories** Martin Conway, 2013 This book provides a state of the art review and critical evaluation of research into flashbulb memories The opening chapters explore the encoding view of flashbulb memory formation and critically appraise a number of lines of research that have opposed this view It is concluded that this research does not provide convincing evidence for the rejection of the encoding view Subsequent chapters review and appraise more recent work which has generally found in favour of the flashbulb concept But this research too does not provide unequivocal support for the encoding view of flashbulb memory formation Evidence from clinical studies of flashbulb memories particularly in post traumatic stress disorder and related emotional disturbances is then considered The clinical studies provide the most striking evidence of flashbulb memories and strongly suggest that these arise in response to intense affective experiences Neurobiological models of memory formation are briefly reviewed and one view suggesting that there may be multiple routes to memory formation is explored in detail From this research it seems possible that there could be a specific route for the formation of detailed and durable memories associated with emotional experiences In the final chapter a cognitive account of flashbulb memories is outlined This account is centred on recent plan based theories of emotion and proposes that flashbulb memories arise in responses to disruptions of personal and cultural plans This chapter also considers the wider functions of flashbulb memories and their potential role in the formation of generational identity *The Software Encyclopedia* ,1986 Subject Guide to Books in Print ,2001
