## Changing The Food Game:

**Changing the Food Game** Lucas Simons, 2017 By 2050 the world's population is estimated to grow to 10 billion To feed everyone we will have to double our food production to produce more food in the next 40 years than in the whole of the last 6 000 Changing the Food Game shows how our unsustainable food production system cannot support this growth In this prescient book Lucas Simons argues that the biggest challenge for our generation can only be solved by effective market transformation to achieve sustainable agriculture and food production Lucas Simons explains clearly how we have created a production and trading system that is inherently unsustainable But he also demonstrates that we have reason to be hopeful from a sustainability race in the cocoa industry to examples of market transformation taking place in palm oil timber and sugarcane production He also poses the question where next Provocative and eye opening Changing the Food Game uncovers the real story of how our food makes it on to our plates and presents a game changing solution to revolutionize the industry Provided by publisher
