Changing Her Mind:

Theories of Learning and Studies of Instructional Practice Timothy Koschmann, 2011-04-19 This is a book about an attempt to change the way math was taught in a particular classroom Its title plays on our everyday usage of the terms theory and practice In education these terms are conventionally treated oppositionally we have theories about what we should do and we have what teachers actually do do In this way theory stands prior logically and chronologically to practice practice inevitably becoming theory s imperfect realization We seek in this volume however to develop a different stance with regard to the relationship between the two Taking the details of instructional practice as our principle object of study we explore what role theories of learning might play in illuminating such practices The book is about actual practices by which teaching is done and how contemporary theories of learning might help us understand those practices It seeks to provide a foundation for future practice based inquiry in education by addressing the methodological question How do we go about studying instructional practice in a principled way
