**CASE** Consumers of technology constantly demand devices that are smaller, more efficient, and more powerful than the ones they have. But most consumers don't understand the massive back-end infrastructure that powers their "front end" devices, like mobile phones, smartphones, tablets, and desktop computers, nor the impact that this infrastructure has on the environment.

Take, for example, the smartphone. iPhones, Androids, and BlackBerrys represent a trend in all forms of mobile technology towards smaller devices that perform an increasingly large number of functions. But every time a smartphone user connects to the Internet, places a call, or sends an instant message, it uses power not only on their phone, but at every step
