

Chapter 1 Land and soil management

Objective – to minimise soil degradation and loss from the property

Farm businesses should always implement management practices that maintain or improve soil condition.

To achieve this objective, horticulturalists need to consider issues such as:

- 1a Soil erosion caused by water;
- 1b Soil erosion caused by wind;
- 1c Soil structure;
- 1d Salinity;
- 1e Soil acidity and alkalinity; and
- 1f Sodicity.

The priorities for soil management vary depending on soil type, topography of the land, surrounding environment, previous land use and climate. The priority given to the soil management practices discussed in this section will vary from farm to farm and between production regions.

Selling America Christina A. Ziegler-McPherson, 2017-02-16 An in depth look at the motivations behind immigration to America from 1607 to 1914 including what attracted people to America who was trying to attract them and why Between 1820 and 1920 more than 33 million Europeans immigrated to the United States seeking the American Dream an image of America as a land of opportunity and upward mobility sold to them by state governments railroads religious and philanthropic groups and other boosters But Christina A Ziegler McPherson shows that the desire to make and keep America a white man s country meant that only Northern Europeans would be recruited as settlers and future citizens while Africans Asians and other non whites would either be grudgingly tolerated as slaves or guest workers or be excluded entirely This book reframes immigration policy as an extension of American labor policy and connects the removal of American Indians from their lands to the settlement of European immigrants across the North American continent Ziegler McPherson contends that western and midwestern states with large American Indian Asian or Mexican populations developed aggressive policies to promote immigration from Europe to help displace those peoples while Southern states sought to reduce their dependency upon Black labor by doing the same Chapters highlight the promotional policies and migration demographics for each region of the United States

Nile River Basin ,2013 A participatory approach for hydrometeorological monitoring in the Blue Nile River Basin of Ethiopia Zemadim, B.,McCartney, M.,Langan, S.,Sharma, B.,2014-04-08 Participatory research is increasingly recognized as being useful for conducting multiple activities in research for development projects The co learning environment created in participatory research helps to identify existing social and technological gaps and develop possible solutions to improve the livelihoods of rural communities This report describes a participatory approach used in the establishment and implementation of hydrometeorological monitoring networks in the Blue Nile River Basin of Ethiopia The networks were established with the involvement of rural communities and other stakeholders to gain insights into the hydrological processes of the watersheds in order to improve rainwater management strategies Local people were involved in the day to day management and maintenance of the networks The participatory approach proved beneficial for several reasons not least because it instilled trust and goodwill amongst the communities
