

**INTRODUCTION**

An important centre of resources for instructional purposes in Environmental Studies is the modern school library. Modern instructional program emphasizes the training of pupils to think and form judgments independently. This requires the provisions of a variety of material of which school library is the central clearing-house. As an important service agency it provides guidance to teachers in curriculum construction to pupils in the selection of books and to adults in reading and in counseling. In a democratic society like ours, the school library lays the foundation for free enquiry and intellectual development, so essential for sharing public opinion.

The school library has expanded from a depository of books into a resource centre, used extensively by all members of the school family. It reaches every classroom, touches every pupil and teacher and even moves out into the community. It helps the teacher to enrich the curriculum and facilitates personal and professional reading. It helps the student to gain meaningful learning experiences. It provides for recreational and hobby interests to the community. It is a storehouse of all types of teaching aids, including maps, charts, pictures, models, manuscripts etc. It gives new depth to the learning experiences and the personal lives of the pupils. Its place in a modern school cannot be filled by any other agency.

**Functions of the School Library***1. Providing materials of instruction and reading*
