Concepts in Electrical and Computer Engineering with Practical Design Problems Reza Adhami, III Peter M. Meenen, Peter Meenen, Denis Hite, 2007 In many cases the beginning engineering student is thrown into upper level engineering courses without an adequate introduction to the basic material This at best causes undue stress on the student as they feel unprepared when faced with unfamiliar material and at worst results in students dropping out of the program or changing majors when they discover that their chosen field of engineering is not what they thought it was The purpose of this text is to introduce the student to a general cross section of the field of electrical and computer engineering The text is aimed at incoming freshmen and as such assumes that the reader has a limited to nonexistent background in electrical engineering and knowledge of no more than pre calculus in the field of mathematics By exposing students to these fields at an introductory level early in their studies they will have both a better idea of what to expect in later classes and a good foundation of knowledge upon which to build **Seven Fundamental Concepts in Spacetime Physics** Vesselin Petkov, 2024-01-12 The book presents seven fundamental concepts in spacetime physics mostly by following Hermann Minkowski s revolutionary ideas summarized in his 1908 lecture Space and Time These concepts are spacetime inertial and

accelerated motion in spacetime physics the origin and nature of inertia in spacetime physics relativistic mass gravitation gravitational waves and black holes They have been selected because they appear to be causing most misconceptions and confusion in spacetime physics This second edition has been revised to include additional clarifications more detailed elaboration of the arguments and also new material published in the interim
