- Computerized databases are the largest factor that has changed the need for forensic science.
 - Began with the development of automated identification systems.
- Fingerprint identification systems were initially private but became a gov't sponsored activity.
 - Systems can make use of 10-print fingerprint cards and latent fingerprints
- All states have access to fingerprint database and are interconnected through the federal system.
- Databases have expanded and now collect DNA through the CODIS database.
 - CODIS= Combined DNA Indexing System
- Forensic-based databases are expanding in areas such as firearms-related and trace evidence-based databases.
- Forensic science labs work on criminal and civil cases.
 - Civil ex. Product failure liability, paternity resolutions
- Most public forensic science labs are supported by municipalities, counties, states gov'ts or the federal gov't
- Broad term for different scientific and technological specialty areas

CONTRIBUTIONS PROVIDED BY FORENSIC LABS

- Aid in investigation of incidents of possible legal interest
 - Work submitted to and done in forensic labs is *post facto* (after crime committed and suspect is arrested)
- Help establish basic legal elements of a crime
 - *Corpus delicti*= body or "element" of crime
 - Elements are things that prosecutor is obligated to prove beyond reasonable doubt to gain conviction
 - Must prove all required elements of crime
- Support or disprove statements by witnesses, victims or suspects
 - If physical evidence and analysis shows something that contradicts a statement by someone in a case, the statement is incorrect
- Identify substances or materials
 - Examination of physical evidence provides identification of a substance or material.
 - Ex. Controlled substance possession or counterfeiting case
- Identify persons
 - Automated Fingerprint Identification System (AFIS) contains known fingerprints and evidentiary fingerprints not yet identified
 - National Integrated Ballistic Identification Network (NIBIN) contains image data from bullets and cartridge cases from known weapons seized in case and from evidence collected in unsolved
